The Arunachal Pradesh Schedule of Rate and Arunachal Pradesh Analysis of Rate published by Arunachal Pradesh Public Works Department since 1985 is a bench mark for construction industry in the State of Arunachal Pradesh.

I am happy to know that the Arunachal Pradesh Schedule of Rates and Arunachal Pradesh Analysis of Rate 2014 for Road and Bridge works is being brought out by Public Works Department, Arunachal Pradesh which will facilitate realistic project estimation as well as precise implementation at site for development of road and building infrastructure in the State.

My best wishes to the Public Works Department, Arunachal Pradesh.

(Gojen Gadi)

MESSAGE

The Public Works Department under Government of Arunachal Pradesh is one of the premier organization for construction of roads and bridges in the State of Arunachal Pradesh inheriting the construction activities from CPWD alongwith its works manual in implementation of the projects.

For any construction works, the schedule of rate plays an important role in pre-construction activities like preparation of estimate, design and scheduling of projects. To meet the objective the Public Works Department of Arunachal Pradesh publishes APSR and APAR updating the cost of items of works incorporating the latest technologies and experience gained at site of work at regular interval.

It gives me immense pleasure to know that, Public Works Department of Arunachal Pradesh is releasing APAR 2014 and APSR 2014 for Road and Bridge works, incorporating the items feasible for adoption in the various topographical condition of the State. The Engineers at site may adopt the schedule of rate considering the required specification for durability of the structure at particular site in priority.

I congratulate all officers involved in preparation of APSR 2014 and APAR 2014 for Road and Bridge works. I am also sure that, they will strive for further possible improvement of the schedule of rate in their next effort.

I wish all success to the Public Works Department in its effort.

(Gonesh Koyu)

FORWARD

Arunachal Pradesh Schedule of Rates 2014 (APSR 2014) and Arunachal Pradesh Analysis of Rates (APAR 2014) covering the items of Road and Bridge works is Published after updating the basic rates of materials to present market rates.

The most of the district headquarter of the state are located mid-belt and upper-belt of the State with varying distance from the foothills. Hence in order to evolve common rates for the major construction activities for the purpose of the publication of the Schedule of Rates 2014, the rates of major construction materials like Cement, Steel and Bitumen are updated based on the rates in nearest authorised dealers located in foothill in Assam and in Arunachal Pradesh. In the process of project costing based on this schedule, the additional cost involved in carriage of materials from approved sources to site of work shall be added to arrive at the actual execution cost. Further the Schedule of Rates shall not be directly adopted for payment to contractor for the work done by them at any site.

Considering the variation in capacity of Trucks and their speed in plains and hill roads separate section for carriage cost of materials in hills roads have been introduced in chapter of carriage of materials in order to provide a common guidance for evaluation of carriage cost of materials.

Basic structure and methodology of items are as per the standard Data Book of the **Ministry of Road Transport and Highways, Govt of India, New Delhi**. The related computer programme of ministry has been deployed for undertaking the analysis. Therefore the executions of items in this schedule at site are to be done in concurrence with the **MoRTH & MoRD Specifications** for Road and Bridge Works.

The basic rates adopted in the analysis are inclusive of all taxes of Central/State and any local monopoly charges but exclusive of carriage cost up to the specific site of work.

It is highly emphasised that while adopting the APSR-2014, the user shall acquaint themselves with the General notes for Road & Bridge for multifarious cost assumptions considered like CP & OH in the analysis and all preambles before every chapters and related **MoRTH & MoRD Specifications** precisely for accomplishing itemised tasks.

All effort have been made to include new items relevant to the working conditions of the State of Arunachal Pradesh.

I convey my deep appreciation and sincere thanks to all staff in bringing out this Schedule of Rates 2014 (Road & Bridge works) with a teamwork spirit.

It is brought to the notice of the all field engineers that, we are in continuous process of updating the Schedule for Road and Bridge works. Therefore a realistic feedback of rate of actual procurement from sources with copies of invoices or quotations if any pertaining to different materials/locations may send to this office for incorporating the same in the next schedule with suggestions if any for further improvement.

**Chief Engineer (SID&P)
PWD, A.P. Itanagar.**

PREFACE

1. Arunachal Pradesh Schedule of Rates (APSR) 2014 includes the existing items of APSR 2012 for road and bridge works with its supplement, deletion of few obsolete items and addition of new items in line with emerging trends in construction road industry.

2. Following are the salient features of APSR 2014:

(a) As such the carriage of materials on hill road with variant capacities of truck load a new section for carriage of materials on hill road has been introduced in the chapter 1 of carriage of materials.

(b) The basic materials incorporated in this APSR 2014 are conforming to IRC standard / MORTH's specification.

(c) A new item for steel pile has been introduced considering various site Conditions/locations. However, this item need to be operated as per the designer discretion.

3. The rates of APSR 2012 has been thoroughly revised and updated to make input to APSR 2014 with prevailing market rates from nearby dealers. Few local made products has been updated with local market rates.

4. In location where more the temperature drops below 5°C for three consecutive days, special arrangement for concreting is required in order to ensure quality of concrete as design. Hence additional costs required for such arrangement have been included in terms of percentage of cost of normal concreting.

5. The Overhead charges for road works has been fixed at 10% and for bridge work at 20% considering the requirement of the amount of contingent activities in each type of construction and its implication on the cost of the project . The established responsibilities for this provision has been clearly elaborated in the general notes for road works and for bridge works each separately. However the contractor profit has been considered at 10% for both.

6. I express my sincere thanks to all ASWs and Sri S. Syed Ummer, JE(SID&P), Smti Chayinika Vashisth, D'man(SID&P) who has contributed by hard work in compiling and finalizing the APSR 2014 with team spirit.

Although due care has been taken to bring APSR 2014 as correctly as possible, there is possibility that some errors might have crept inadvertently. In case any error or omission is noticed, it may be brought to notice of the SSW (SID&P) for compliance in next release.

(Hage Pilliya)

M-021	Stone crusher dust finer than 3mm with not more than 10% passing 0.075 sieve.	cum	560	560.00
M-022	Coarse graded Granular sub-base Material 2.36 mm & below	cum	560	560.00
M-023	Coarse graded Granular sub-base Material 4.75mm to 75 micron mm		600	600.00
M-024	Coarse graded Granular sub-base Material 4.75 mm to 2.36 mm	cum	600	600.00
M-025	Coarse graded Granular sub-base Material 9.5 mm to 4.75 mm	cum	650	650.00
M-026	Coarse graded Granular sub-base Material 26.5 mm to 4.75 mm	cum	700	700.00
M-027	Coarse graded Granular sub-base Material 26.5 mm to 9.5 mm	cum	750	750.00
M-028	Coarse graded Granular sub-base Material 37.5 mm to 9.5 mm	cum	800	800.00
M-029	Coarse graded Granular sub-base Material 53 mm to 26.5mm	cum	850	850.00
M-030	Aggregates below 5.6 mm	cum	1640	1640.00
M-031	Aggregates 22.4 mm to 2.36 mm	cum	875	875.00
M-032	Aggregates 22.4 mm to 5.6 mm	cum	1365	1365.00
M-033	Aggregates 45 mm to 2.8 mm	cum	640	640.00

M-034	Aggregates 45 mm to 22.4 mm	cum	850	850.00
M-035	Aggregates 53 mm to 2.8 mm	cum	700	700.00
M-036	Aggregates 53 mm to 22.4 mm	cum	826	826.00
M-037	Aggregates 63 mm to 2.8 mm	cum	675	675.00
M-038	Aggregates 63 mm to 45 mm	cum	804	804.00
M-039	Aggregates 90 mm to 45 mm	cum	782	782.00
M-040	Aggregates 10 mm to 5 mm	cum	1750	1750.00
M-041	Aggregates 11.2 mm to 0.09 mm	cum	950	950.00
M-042	Aggregates 13.2 mm to 0.09 mm	cum	815	815.00
M-043	Aggregates 13.2 mm to 5.6 mm	cum	1500	1500.00
M-044	Aggregates 13.2 mm to 10 mm	cum	1338	1338.00
M-045	Aggregates 20 mm to 10 mm	cum	1400	1400.00
M-046	Aggregates 25 mm to 10 mm	cum	1350	1350.00
M-047	Aggregates 19 mm to 6 mm	cum	1465	1465.00
M-048	Aggregates 37.5 mm to 19 mm	cum	950	950.00
M-049	Aggregates 37.5 mm to 25 mm	cum	850	850.00
M-050	Aggregates 6 mm nominal size	cum	1740	1740.00
M-051	Aggregates 10 mm nominal size	cum	1750	1750.00
M-052	Aggregates 13.2/12.5 mm nominal size	cum	1700	1700.00
M-053	Aggregates 20 mm nominal size	cum	1600	1600.00
M-054	Aggregates 25 mm nominal size	cum	1550	1550.00
M-055	Aggregates 40 mm nominal size	cum	1250	1250.00

Sl. No.	Description					Unit	Rate
M-056	AC pipe 100 mm dia					metre	31.00
M-057	Acrylic polymer bonding coat					litre	250.00
M-058	Alluminium Paint		As per Market rate			litre	303.00
M-059	Aluminium alloy plate 2mm Thick					sqm	input
M-060	Aluminium alloy/galvanised steel		As per Market rate			tonne	53931.00
M-061	Aluminium sheeting fixed with encapsulated lens type reflective sheeting including 2% towards lettering, cost of angle iron, cost of drilling holes, nuts, bolts etc.and signs as applicable		As per Market rate			sqm	145.00
M-062	Aluminium studs 100 x 100 mm fitted with lense reflectors					nos	484.00
M-063	Barbed wire					kg	90.00
M-064	Bearing (Cost of parts)					nos	input
M-065	Bearing (Cast steel rocker bearing assembly of 250 tonne)					nos	302500.00
M-066	Bearing (Elastomeric bearing assembly consisting of 7 internal layers of elastomer bonded to 6 nos. internal reinforcing steel laminates by the process of vulcanisation,)		As per Market rate			nos	14520.00
M-067	Bearing (Forged steel roller bearing of 250 tonne		As per Market rate			nos	266200.00

M-068	Bearing (Pot type bearing assembly consisting of a metal piston supported by a disc, PTFE pads providing sliding surfaces against stainless steel mating together with cast steel assemblies/fabricated structural steel assemblies duly painted with all components		As per Market rate			nos	60500.00
M-069	Bearing (PTFE sliding plate bearing assembly of 80 tonnes)		As per Market rate			nos	181500.00
M-070	Bearing (Supply of sliding plate bearing of 80 tonne)		As per Market rate			nos	14520.00
M-071	Bentonite		As per Market rate			kg	3.10
M-072	Binding wire					kg	80.00
M-073	Bitumen (Cationic Emulsion)		As per Market rate			tonne	42259.00
M-074	Bitumen (60-70 grade)					tonne	52365.00
M-075	Bitumen (80-100 grade)					tonne	51433.00
M-076	Bitumen (Cutback)		As per Market rate			tonne	54106.00
M-077	Bitumen (emulsion)					tonne	42259.00
M-078	Bitumen (modified graded)					tonne	47052.00
M-079	Brick		As per Market rate			each	9.00
M-080	C.I.shoes for the pile					kg	55.00
M-081	Cement		As per Market rate			tonne	8120.00
M-082	Cold twisted bars (HYSD Bars)/TMT		As per Market rate			tonne	53650.00
M-083	Collar for joints 300 mm dia		As per Market rate			nos	126.00

M-084	Compressible Fibre Board(20mm thick)					sqm	682.00
M-085	Connectors/ Staples		As per Market rate			each	55.00
M-086	Copper Plate(12m long x 250mmwide)					kg	660.00
M-087	Corrosion resistant Structural steel					tonne	61000.00
M-088	Corrugated sheet, 3 mm thick, "Thrie" beam section railing		As per Market rate			kg	60.00
M-089	Credit for excavated rock found suitable for use					cum	231.00
M-090	Curing compound		As per Market rate			liter	49.00
M-091	Delineators from ISI certified firm as per the standard drawing given in IRC - 79		As per Market rate			each	input
M-092	Earth Cost or compensation for earth taken from private land		As per Market rate			cum	0.00
M-093	Elastomeric slab seal expansion joint assembly manufactured by using chloroprene, elastomer for elastomeric slab unit conforming to clause 915.1 of IRC: 83 (part II),					metre	9900.00
M-094	Electric Detonators @ 1 detonator for 1/2 gelatin stick of 125 gms each					100 nos	990.00
M-095	Epoxy compound with accessories for preparing epoxy mortar					kg	220.00
M-096	Epoxy mortar					kg	input
M-097	Epoxy primer					kg	250.00
M-098	Epoxy resin-hardner mix for prime coat					kg	150.00
M-099	Flag of red color cloth 600 x 600 mm					each	60.00
M-100	Flowering Plants					each	13.00
M-101	Galvanised MS flat clamp					nos	33.00
M-102	Galvanised steel wire crates of mesh size 100 mm x 100 mm woven with 4mm dia. GI wire in rolls of required size.					sqm	170.00
M-103	Galvanised structural steel plate 200 mm wide, 6 mm thick, 24 m long					kg	198.00
M-104	Gelatin 80%					kg	148.00

M-105	Geo grids					sqm	input
M-106	Geomembrane		As per Market rate			sqm	input
M-107	Geonets		As per Market rate			sqm	input
M-108	Geotextile		As per Market rate			sqm	45.00
M-109	Geotextile filter fabric					sqm	input
M-110	GI bolt 10 mm Dia					nos	38.00
M-111	Grouting pump with agitator		As per Market rate			hour	165.00
M-112	Grass (Doob)		As per Market rate			kg	13.00
M-113	Grass (Fine)					kg	13.00
M-114	HDPE pipes 75mm dia					metre	42.00
M-115	HDPE pipes 90mm dia					metre	input
M-116	Hedge plants					each	7.70
M-117	Helical pipes 600mm diameter					metre	1155.00
M-118	Hot applied thermoplastic compound		As per Market rate			litre	179.00
M-119	HTS strand					tonne	63800.00
M-120	Joint Sealant Compound		As per Market rate			kg	302.00
M-121	Jute netting, open weave, 2.5 cm square opening for seeding and Mulching		As per Market rate			sqm	13.00
M-122	LDO for steam curing					litre	40.00
M-123	M.S. Clamps					nos	55.00
M-124	M.S. Clamps					kg	220.00
M-125	M.S.shoes @ 35 Kg per pile of 15 m					kg	50.00
M-126	Tor Steel bars		As per Market rate			tonne	53650.00

M-127	Modular strip/box seal expansion joint including anchorage catering to a horizontal movement beyond 70 mm and upto 140mm assembly comprising of edge beams, central beam, 2 modules chloroprene seal, anchorage elements, support and control system, all steel sections protected against corrosion and installed by the manufacturer or his authorised representative					metre	209000.00
M-128	Modular strip/box seal expansion joint catering to a horizontal movement beyond 140mm and upto 210mm box/box seal joint assembly containing 3 modules/cells and comprising of edge beams, two central beams, chloroprene seal, anchorage elements, support and control system, all steel sections protected against corrosion and installed by the manufacturer or his authorised representative					metre	231000.00
M-129	Nipples 12mm					nos	27.00
M-130	Nuts and bolts					kg	100.00
M-131	Paint		As per Market rate			litre	290.00
M-132	Pavement Marking Paint		As per Market rate			litre	240.00
M-133	Paving Fabric		As per Market rate			sqm	input
M-134	Perforated geosynthetic pipe 150 mm dia		As per Market rate			metre	input
M-135	Perforated pipe of cement concrete, internal dia 100 mm					metre	85.00
M-136	Pesticide					kg	308.00
M-137	Pipes 200 mm dia, 2.5 m long for drainage					metre	input
M-138	Plastic sheath, 1.25 mm thick for dowel bars		As per Market rate			sqm	0.90
M-139	Plastic tubes 50 cm dia, 1.2 m high					nos	input
M-140	Polymer braids					metre	input
M-141	Pre moulded Joint filler, 25 mm thick for expansion joint.		As per Market rate			sqm	550.00
M-142	Pre-coated stone chips of 13.2 mm nominal size					cum	1800.00
M-143	Preformed continuous chloroprene elastomer or closed cell foam sealing element with high tear strength, vulcanised in a single operation for the full length of a joint to ensure water tightness.					metre	4400.00
M-144	Pre-moulded asphalt filler board					sqm	60.00

M-145	Pre-packed cement based polymer concrete of strength 45 Mpa at 28 days					kg	33.00
M-146	Primer		As per Market rate			kg	170.00
M-147	Quick setting compound		As per Market rate			kg	50.00
M-148	Random Rubble Stone					cum	517.00
M-149	RCC Pipe NP 2 heavy duty non pressure pipe 1000 mm dia		As per Market rate			metre	1590.00
M-150	RCC Pipe NP 2 heavy duty non pressure pipe 1200 mm dia		As per Market rate			metre	1925.00
M-151	RCC Pipe NP 2 heavy duty non pressure pipe 300 mm dia					metre	423.00
M-152	Reflectorising glass beads		As per Market rate			kg	208.00
M-153	Reinforcement strips 60 mm wide 5 mm thick as per clause 3102. (Copper Strips)		As per Market rate			metre	input
M-154	Reinforcement strips 60 mm wide 5 mm thick as per clause 3102. (Galvanised carbon steel strips)		As per Market rate			metre	input
M-155	Reinforcement strips 60 mm wide 5 mm thick as per clause 3102. (Glass reinforced polymer/fibre reinforced polymer/polymeric strips)		As per Market rate			metre	input
M-156	Reinforcement strips 60 mm wide 5 mm thick as per clause 3102. (Stainless steel strips)					metre	input
M-157	Reinforcement strips 60 mm wide 5 mm thick as per clause 3102. Aluminium strips)		As per Market rate			metre	325.00

M-158	Rivets					each	0.90
M-159	Sand bags (Cost of sand and Empty cement bag)		As per Market rate			nos	8.80
M-160	Sapling 2 m high 25 mm dia		As per Market rate			each	88.00
M-161	Scrap tyres of size 900 x 20					nos	121.00
M-162	Seeds					kg	302.00
M-163	Selected earth		As per Market rate			cum	181.00
M-164	Separation Membrane of impermeable plastic sheeting 125 micron thick		As per Market rate			sqm	27.00
M-165	Sheathing duct					metre	99.00
M-166	Shrubs					each	11.00
M-167	Sludge / Farm yard manure @ 0.18 cum per 100 sqm at site of work for turfing					cum	121.00
M-168	Sodium vapour lamp		As per Market rate			each	1815.00
M-169	Square Rubble Coursed Stone					cum	517.00
M-170	Steel circular hollow pole of standard specification for street lighting to mount light at 5 m height above deck level		As per Market rate	As per Market rate		each	5500.00
M-171	Steel circular hollow pole of standard specification for street lighting to mount light at 9 m height above road level		As per Market rate			each	9075.00
M-172	Steel drum 300 mm dia 1.2 m high/empty bitumen drum		As per Market rate			nos	60.00

M-173	Steel helmet and cushion block on top of pile head during driving.					kg	181.00
M-174	Steel pipe 25 mm external dia as per IS:1239		As per Market rate			metre	192.00
M-175	Steel pipe 50 mm external dia as per IS:1239		As per Market rate			metre	385.00
M-176	Steel wire rope 20 mm		As per Market rate			kg	245.00
M-177	Steel wire rope 40 mm		As per Market rate			kg	221.00
M-178	Strip seal expansion join					metre	12100.00
M-179	Structural Steel					tonne	57210.00
M-180	Super plastisizer admixture IS marked as per 9103-1999					kg	55.00
M-181	Synthetic Geogrids as per clause 3102.8 and approved design and specifications.					sqm	input
M-182	Through and bond stone					each	13.00
M-183	Tie rods 20mm diameter					nos	247.00
M-184	Tiles size 300 x 300 mm and 25 mm thick		As per Market rate			each	input
M-185	Timber					cum	24500.00
M-186	Traffic cones with 150 mm reflective sleeve		As per Market rate			nos	1320.00
M-187	Tube anchorage set complete with bearing plate, permanent wedges etc		As per Market rate			nos	4180.00
M-188	Unstaked lime					tonne	11550.00
M-189	Water					KL	60.00
M-190	Water based cement paint		As per Market rate			litre	77.00
M-191	Welded steel wire fabric		As per Market rate			kg	60.00
M-192	Wire mesh 50mm x 50mm size of 3mm wire					kg	145.00
M-193	Wooden ballies 2" Dia for bracing					each	38.00
M-194	Wooden ballies 8" Dia and 9 m long					each	495.00
M-195	Wooden packing		As per Market rate			cum	14500.00

M-196	Wooden staff for fastening of flag 25 mm dia, one m long		As per Market rate			each	60.00
M-197	CRRI-Bitchem Coldmix Binder	Coldmix can be produced by Pug mill, WMM plant or Concrete mixer				tonne	57107.00
	Overheads for Road Works	10 %					
	Contractors profit for Road Works	10 %					
	Overheads for Bridge Works	20 %		for input of Overheads or Contractors profit please type in collum C as like below			
	Overheads for Bridge Works (Rehabilitation)	10 %		Type symble of apostrophe(') then input value then one space then symble of percentage (%) for example '08 %			
	Contractors profit for Bridge Works	10 %					
	Lead from Mixing Plant to working site		0 km				
	Lead for E/W borow area to site		3 km				
	Lead for fly ash from source to site		50 km				

Items No.	Summary of Rates calculated and used for analysis of rates of other items	Unit	Rate
Item 8.3	Printing new letter and figures of any shade (ii) English Roman	per cm height per letter	0.60
Item 8.8	Painting Two Coats on New Concrete Surfaces	sqm	77.00

Item 12.11 (C) i	PCC Grade M20 for Open Foundation (Bottom Plug) Per Cum Basic Cost of Labour, Material & Machinery by Batching Plant	cum	5328.00
Item 12.11 (C) ii	PCC Grade M25 for Open Foundation (Bottom Plug) Per Cum Basic Cost of Labour, Material & Machinery by Mixer	cum	5713.00
Item 12.11 (C) ii	PCC Grade M25 for Open Foundation (Bottom Plug) Per Cum Basic Cost of Labour, Material & Machinery by Batching Plant	cum	5575.00
Item 12.11 (C) iii	PCC Grade M30 for Open Foundation (Bottom Plug) Per Cum Basic Cost of Labour, Material & Machinery by Mixer	cum	5762.00
Item 12.11 (C) iii	PCC Grade M30 for Open Foundation (Bottom Plug) Per Cum Basic Cost of Labour, Material & Machinery by Batching Plant	cum	5626.00
Item 12.11 (C) iv	PCC Grade M35 for Open Foundation (Bottom Plug) Per Cum Basic Cost of Labour, Material & Machinery by Mixer	cum	5875.00
Item 12.11 (C) iv	PCC Grade M35 including OH & CP for Well Foundation (Bottom Plug) by Batching Plant	cum	7920.00

Item 12.11 (C) iv	PCC Grade M35 for Open Foundation (Bottom Plug) Per Cum Basic Cost of Labour, Material & Machinery by Batching Plant	cum	5737.00
Item 12.11 (F) iv	PCC Grade M35 including OH & CP for Well Foundation (Well Cap) by Batching Plant	cum	7725.00
Item No. 3.13	Excavation for Structures (Manual Means)	cum	254.00
Item No. 3.13	Excavation for Structures (Mechanical Means)	cum	46.00
Item 14.1(A)	RCC Grade M20 for super-structure including OH & CP by Batching Plant	cum	7958.00
Item 14.1(B)	RCC Grade M20 for super-structure including OH & CP by Batching Plant	cum	8713.00
Item 14.1(E)	RCC Grade M20 for super-structure including OH & CP by Batching Plant	cum	9261.70
Item 14.1(C)	RCC Grade M30 for super-structure including formwork and excluding OH & CP by Batching Plant	cum	6673.00
Item 14.1(C)	RCC Grade M30 for super-structure excluding formwork and excluding OH & CP by Batching Plant	cum	5561.00
Item 14.2 A	Supplying ,fitting and placing HYSD bar reinforcement in super-structure excluding OH & CP	tonne	60305.00
Item 13.6	Supplying, fitting and placing HYSD including OH & CP for sub-structure	tonne	78328.00
Item 5.17	Fog Seal	sqm	45.00
Item 5.21 Case-I	Crack Prevention courses. Case-I Stress Absorbing Membrane (SAM) crack width less than 6 mm	sqm	76.00
Item 5.21 Case-II	Crack Prevention courses. Case-II Stress Absorbing Membrane (SAM) with crack width 6 mm to 9 mm	sqm	88.00
Item 5.21 Case-IV	Crack Prevention courses. Case-III Stress Absorbing Membrane (SAM) crack width above 9 mm and cracked area above 50 %	sqm	115.00
Item 5.21 Case-IV	Crack Prevention courses. Case-IV Bitumen Impregnated Geotextile	sqm	129.00
Item 5.15 Case-I	Slurry Seal Case-I 5 mm thickness	sqm	72.00
Item 5.15 Case-II	Slurry Seal Case-II 3 mm thickness	sqm	50.00

Item 5.15 Case-III	Slurry Seal Case III 1.5 mm thickness	sqm	30.00
Item 5.9 Case-I	Surface Dressing Case-I 19 mm nominal chipping size	sqm	112.00
Item 5.9 Case-II	Surface Dressing Case-II 13 mm nominal size chipping	sqm	91.00

A. Roads Works

Basic Notes for Preparation of Schedule of Rates

The basic approach for the preparation of schedule of rates for Road Works is indicated as under :

Description of items

1. The description of items is given briefly and linked with the relevant clauses of the MoRT&H Specifications for Road and Bridge Works, which may be referred for detailed description, provisions and interpretations.

2. **Mechanical Means**

Due to mechanization of construction work, rate for various items have been derived using mechanical means. However, manual means have also been provided for certain cases, where areas may be inaccessible for machines or quantum of work may not be large enough to justify deploy of the machines.

3. **Overhead Charges**

- 3.1 **10 percent overhead charges has been considered in the schedule of rates for**

- i. Site accomodation, setting up plant, access road, water supply, electricity and general site arrangements.
- ii. Office furniture, equipment and communications.
- iii. Expenditure on
 - a) Corporate office of contractor
 - b) Site Supervision
 - c) Documentation and "as built" drawings
- iv. Mobilisation/de-mobilisation of resources.
- v. Labour camps with minimum amenities and transportation to work sites.
- vi. Light vehicles for site supervision including administrative and managerial requirements
- vii. Laboratory equipment and quality control including field and laboratory testing
- viii. Minor T&P and survey instruments and setting out works, including verification of line, dimensions, trial pits and bore holes, where required
- ix. Watch and ward
- x. Traffic management during construction
- xi. Expenditure on safeguarding environment
- xii. Sundries
- xiii. Financing Expenditure

xiv. Sales/Turn over tax

xv. Work Insurance/compensation

4. **Contractor Profit**

4.1 **10 percent of cost of works. Contractor profit is also added on overhead charges.**

5. **Basic Inputs**

Other than the Basic inputs given in the standard data book of MoRT&H, the rates for Plant&equipments, material and labour are as per the prevailing market rates from the nearby authorised dealers/Quarry etc., with all taxes/charges inclusive on Zero lead basis.

6. **Plants and Equipment**

6.1 A dozer is proposed for excavation where cutting and filling for the roadway is within 100 m. For longer leads, a combination of hydraulic excavator and tipper is proposed.

6.2 Keeping in view the job and managerial factors and the age factor of machines, the output of plant and equipment is taken approximately 70 percent of the rated capacity given by manufacture under ideal conditions.

6.3 It has been assumed that a water tanker would make one trip per hour on an average. Water charges have not been included for items where the requirement is very nominal. It is assumed that the same would be covered under sundries.

6.4 Output of plant/equipment is considered for the compacted quantities.

6.5 The usage charges for machines include ownership charges, cost of repair and maintenance including replacement of tyres and running and operating charges which includes crew, fuel and lubricants.

7. **Materials**

7.1 Quantities of materials considered in the rate are approximate for the purpose of estimating and include normal wastages. Actual consumption would have to be based on mix design.

7.2 Arunachal Pradesh has typical and hard terrain having different altitude, wherein maximum construction material are brought from Assam and utilised in different station located in state. Hence, to maintain the uniformity in rates, it is decided to prepare the APSR without considering any lead on materials and aggregate. The transportation cost shall be included in the estimate as per distance from the source of procurement of material/aggregate. The following sources has been adopted in the schedule

(1) All steel items/Bitumen product - Nearby Authorised Dealer.

(2) Cement :- Banderdewa/Bhalukpong/Likabali/Dholla/Margherita

(3) Bricks :- Klin in Assam nearby to Arunachal Pradesh

- (4) Aggregate :- At quarry nearby site of work.
- (5) Other items :- Average market rates fixed for all district headquarter of state.
- (6) R.C.C. Hume Pipes :- Naharlagun/Likabali or nearby source.

7.3 The alternative proposal for crushing own aggregate by installing crusher is compared with procurement of crushed aggregates from the market and proposal found economical is adopted.

7.4 The specifications of materials shall be governed by section 1000 of MoRT&H Specifications for Road and Bridge Works.

8. **Labour**

8.1 The average market rate has been adopted which are workable in the state

8.2 One mate has been provided for 25 labours

9. **Carriage of Materials**

9.1 The unit for vehicle for carriage has been taken as under :

- a) In hours where lead is variable. The loading and unloading for such cases have been provided separately.
- b) In tonne - km where lead is variable. The loading and unloading for such cases have been provided separately.
- c) Zero lead has been considered for the stone aggregate in order to work out the actual rates of aggregates by adding the transportation cost up to the site of work.
- d) In case of Hot Mix Plant Zero lead has been considered. The lead may be considered as per actual location of plant.

9.2 Where the quantity of material to be transported is small such as dismantled materials and the same are required to be loaded manually, provision of tractor-trolley has been made instead of tipper.

10. **General :**

10.1 The clause numbers refer to MoRT&H Specifications for Road and Bridges Works.

10.2 Assumptions made have been indicated in respective chapter in the form of notes, where required.

10.3 Sundries to cater for unforeseen contingency and miscellaneous items have been added in the overhead charges.

10.4 Arrangement for traffic during construction shall be as per Clause 112 of MoRT&H Specifications for Road and Bridge Works.

- 10.5 Contractor will make his own arrangements for borrowing earth. However, compensation for earth taken from private land has been included in the rate for construction of embankment with borrowed earth.

10.6 **Credit for Dismantled Material**

Credit for dismantled materials has not been included in this schedule of rates. The dismantled materials should be examined and a realistic assessment made for such materials, which can be utilised for works and to be reflected in the estimate.

- 10.7 The source of material and samples are required to be approved by the Engineer-in-Charge before start of any work.
- 10.8 The rates of items include cost of testing of soil, materials and works.
- 10.9 The use of surface by construction vehicles shall be governed by Clause 119 of MoRT&H Specifications.
- 10.10 The contractor shall arrange to provide and maintain an adequate equipment field laboratory as per Clause 121.
- 10.1 Quality Control of works shall be governed by Section 900 of MoRT&H Specifications.
- 10.1 The various activities of works shall also be documented by photographs and video cassettes as per Clauses 125 & 126 of MoRT&H Specifications.
- 10.1 The classification of soil shall be as per Clause 301.2 of MoRT&H Specifications.
- 10.1 The earth excavated from foundations has been considered to be backfilled and balance utilised locally for road work except in the case of marshy soil.
- 10.2 The rate for removal of unsuitable soil does not provide for replacement by suitable soil which will have to be paid separately.
- 10.2 Items for hilly terrain have been analysed separately.
- 10.2 The hire charge rates for machinery and equipment are considered from the prevailing market rate.
- 10.2 10 per cent extra cement has been provided for concreting under water, where required.
- 10.2 Grade of cement may be adopted as per mix design.
- 10.20 Quantities of cement in various grades of cement concrete have been taken as per IRC:21-2000 and IRC:18-2000.
- 10.2 The coarse and fine aggregates shall conform to IS:383.
- 10.2 For pricing of RCC slab culverts, the items given in respective chapters in bridge section may be referred.

- 10.2 Some of major steel producing firms have evolved thermo-mechanically treated steel which has enhanced strength, better corrosion resistance, ductility, weld ability and high temperature thermal resistance. Enquiries from these are made on technical specifications and use of such products considered in works based on performance in works where these have already been used.
- 10.2 In case it is decided to include the following items and their maintenance in the BOQ, the scope and specifications should be worked out and defined in a detailed manner in the tender document to avoid any dispute during execution.

MoRT&H Clau Item

- | | |
|-----|---|
| 120 | Site office and furniture for Engineer and his staff. |
| 122 | Site residential accomodation for Engineer and other supervisory staff. |
| 124 | Providing and maintaining vehicle for the Engineer. |

GENERAL
Notes -Bridge works

The basic approach for the preparation of schedule of rates for Bridge works in indicated as under :

1. Description of items

The description of items is given briefly and linked with relevant clause of MoRT&H's Specifications for Road and Bridge Works, which may be referred for detailed description, provisions and interpretation.

2. Overhead Charges

The rates include over head charges considering the following elements -

2.1 20 percent overhead charges has been considered in the schedule of rates

- i. Site accomodation, setting up plant, access road, water supply, electricity and general site arrangements.
- ii. Office furniture, equipment and communications.
- iii. Expenditure on
 - a) Corporate office of contractor
 - b) Site Supervision
 - c) Documentation and "as built" drawings
- iv. Mobilisation/de-mobilisation of resources.
- v. Labour camps with minimum amenities and transportation to work sites.
- vi. Light vehicles for site supervision including administrative and managerial requirements
- vii. Laboratory equipment and quality control including field and laboratory testing
- viii. Minor T&P and survey instruments and setting out works, including verification of line, dimensions, trial pits and bore holes, where required
- ix. Watch and ward
- x. Traffic management during construction
- xi. Expenditure on safeguarding environment
- xii. Sundries
- xiii. Financing Expenditure
- xiv. Sales/Turn over tax
- xv. Work Insurance/compensation

3 Contractor Profit

3.1 **10 percent of cost of works. Contractor profit is also added on overhead charges.**

4 **Basic Inputs**

Other than the Basic inputs given in the standard data book of MoRT&H, the rates for plants & Equipments, material and labour are as per the prevailing market rates from the nearby authorised dealers/Quarry etc., With all Taxes/Charges inclusive on zero lead basis.

6. **Plants and Equipment**

The usage/hire charges of machinery/equipment have been worked out based upon present cost of equipments, repairs, POL and Operational charges.

7. **Materials**

7.1 Quantities of materials considered in the rate are approximate for the purpose of estimating and include normal wastages. Actual consumption would have to be based on mix design.

7.2 Arunachal Pradesh has typical and hard terrain having different altitude, wherein maximum construction material are brought from Assam and utilised in different station located in state. Hence, to maintain the uniformity in rates, it is decided to prepare the APSR-2005 without considering any lead on materials and aggregate. The transportation cost shall be included in the estimate as per distance from the source of procurement of material/aggregate. The following sources has been adopted in the schedule.

(1) All steel items/Bitumen product - Near by authoised Dealer.

(2) Cement :- Banderdewa/Bhalukpong/Likabali/Dholla/Margherita

(3) Bricks :- Klin in Assam nearby to Arunachal Pradesh

(4) Aggregate :- At quarry nearby site of work.

(5) Other items :- Avarage market rates fixed for all district headquarter of state.

(6) R.C.C. Hume Pipes :- Naharlagun/Likabali or nearby source.

7.3 The alternative proposal for crushing own aggregate by installing crusher is compared with procurement of crushed aggregates from the market and proposal found economical is adopted.

7.4 The specifications of materials shall be governed by section 1000 of MoRT&H Specifications for Road and Bridge Works.

8. **Labour**

8.1 The average market rate has been adopted which are workable in the state

8.2 One mate has been provided for 25 labours

9. **Carriage of Materials**

9.1 The unit for vehicle for carriage has been taken as under :

- a) In hours where lead is variable. The loading and unloading for such cases have been provided separately.
- b) In tonne - km where lead is variable. The loading and unloading for such cases have been provided separately.
- c) Zero lead has been considered for the stone aggregate in order to work out the actual rates of aggregates by adding the transportation cost up to the site of work.

10. **General :**

10.1 The clause numbers refer to MoRT&H Specifications for Road and Bridges Works.

10.2 Assumptions made have been indicated in respective chapter in the form of notes, where required.

10.3 Sundries to cater for unforeseen contingency and miscellaneous items have been added in the overhead charges.

10.4 Arrangement for traffic during construction shall be as per Clause 112 of MoRT&H Specifications for Road and Bridge Works.

10.5 Contractor will make his own arrangements for borrowing earth. However, compensation for earth taken from private land has been included in the rate for construction of embankment with borrowed earth.

10.6 **Credit for Dismantled Material**

Credit for dismantled materials has not been included in this schedule of rates. The dismantled materials should be examined and a realistic assessment made for such materials, which can be utilised for works and to be reflected in the estimate.

10.7 The source of material and samples are required to be approved by the Engineer before start of any work.

10.8 The rates of items include cost of testing of soil, materials and works.

10.9 The contractor shall arrange to provide and maintain an adequate equipment field laboratory as per Clause 121.

10.10 Quality Control of works shall be governed by Section 900 of MoRT&H Specifications.

10.11 The various activities of works shall also be documented by photographs and video cassettes as per Clauses 125 & 126 of MoRT&H Specifications.

10.12 The classification of soil shall be as per Clause 301.2 of MoRT&H Specifications.

- 10.13 The earth excavated from foundations has been considered to be backfilled and balance utilised locally for road work except in the case of marshy soil.
- 10.14 The rate for removal of unsuitable soil does not provide for replacement by suitable soil which will have to be paid separately.
- 10.15 The hire charge rates for machinery and equipment are taken from the Standard Data Book and prevailing market rate.
- 10.16 10 per cent extra cement has been provided for concreting under water, where required.
- 10.17 Grade of cement may be adopted as per mix design.
- 10.18 Quantities of cement in various grades of cement concrete have been taken as per IRC:21-2000 and IRC:18-2000.
- 10.19 The coarse and fine aggregates shall conform to IS:383.
- 10.20 Some of major steel producing firms have evolved thermo-mechanically treated steel which has enhanced strength, better corrosion resistance, ductility, weld ability and high temperature thermal resistance. Enquiries from these are made on technical specifications and use of such products considered in works based on performance in works where these have already been used.
- 10.21 In case it is decided to include the following items and their maintenance in the BOQ, the scope and specifications should be worked out and defined in a detailed manner in the tender document to avoid any dispute during execution.

11. **Guide Bund**

- 11.1 The item for the guide bund are excavation, embankment and protection works.
- 11.2 In case bridge construction works are to be done on wide and deep water channels in major rivers provision of floating barrages etc. for taking the construction materials and equipments inside water shall be made separately.
- 11.3 The item for sinking of wells cover diameters from 6 m to 12 and Twin D Type and size 12 m x 6 m. For other shapes like rectangular or any other size, the rates of sinking may be worked out on pro-rata basis.
- 11.4 The lift for casting of concrete in well steining may be 2 to 2.5 m restricting the free fall of concrete to 1.5 m and concreting layer to 450 mm.

12 **Foundations**

The Corrosion resistant treated Steel Driven Pile item has to be used only after getting the proper design approved by the authorities as per the specific need at the site.

MoRT&H Clause Item

- | | |
|-----|---|
| 120 | Site office and furniture for Engineer and his staff. |
| 122 | Site residential accomodation for Engineer and other supervisory staff. |
| 124 | Providing and maintaining vehicle for the Engineer. |

CHAPTER - 1

CARRIAGE OF MATERIALS

Preamble:

- 1 The rate analysis of loading and unloading of various items include stacking.
- 2 The rate analysis for loading and unloading has been given both by manual and mechanical means. Means of loading/unloading appropriate to the work and site is to be adopted.
- 3 The rate analysis for haulage of materials has been made in terms of tonne-kilometre (t.km) for ease of adoption depending upon the lead in km and load in tonnes.
- 4 The cost of carriage will vary depending upon the riding surface of the road. Provision has accordingly been made considering surfaced roads, unsurfaced gravel roads and katcha tracks.
- 5 Analysis for carriage of materials is exclusive of the loading, unloading and stacking and this has to be added as applicable.
- 6 Carriage of materials if done by boats shall be paid at the same rates as given for carriage of materials by road.
- 7 Analysis and the rates for the Carriage of materials on Hill roads has been made available for judicious application according to site locations.

Summary of Rate Analysis

CHAPTER-1

CARRIAGE OF MATERIALS

Item No.	Descriptions	Unit	Rate
	<u>FOR PLAIN ROADS</u>		
1.1	Loading and unloading of stone boulder / stone aggregates / sand / kanker / moorum. (Placing tipper at loading point, loading with front end loader, dumping, turning for return trip, excluding time for haulage and return trip)	cum	142.00
1.2	Loading and Unloading of Boulders by Manual Means	cum	164.00
1.3	Loading and Unloading of Cement or Steel by Manual Means and stacking.	tonne	203.00
1.4	Cost of Haulage Excluding Loading and Unloading		
(i)	Surfaced Road	tonne.km	5.80
(ii)	Unsurfaced Gravelled Road	tonne.km	7.00
(iii)	Katcha Track and Track in river bed / nallah bed and choe bed.	tonne.km	14.10
	<u>FOR HILL ROADS</u>		
1.5	Loading and Unloading of Stone Boulder/Stone aggregates/Sand/Kanker/Moorum/Lime/Shingle/Surki/Earth/Excavated Rock and Kerb Stone for hill roads. Placing tipper at loading point, loading with front end loader, dumping, turning for return trip, excluding time for haulage and return trip	Cum	142.00
1.6	Loading and Unloading of Stone Boulder/Stone aggregates/Sand/Kanker/Moorum/Lime/Shingle/Surki/Earth/Excavated Rock and Kerb Stones by Manual Means for hill roads.	Cum	164.00
1.7	Loading and Unloading of Cement/Steel/Structural Steel/RC Pipes/Wooden logs/Bricks/Bitumen and timber etc., by Manual Means and Stacking for hill roads.	tonne	203.00
1.8	Cost of Haulage Excluding Loading and Unloading on hill roads. Haulage of materials by tipper excluding cost of loading, unloading and stacking.		
(i)	Surfaced Road	tonne.km	8.30
(ii)	Unsurfaced Graveled Road	tonne.km	10.00
(iii)	Katcha Track and Track in River Bed/Nallah Bed and Choe Bed.	tonne.km	20.20
1.9	Cost of Haulage of Bitumen Excluding Loading and Unloading on hill roads. Haulage of materials by truck excluding cost of loading, unloading and stacking.		
(i)	Surfaced Road	tonne.km	9.60
(ii)	Unsurfaced Graveled Road	tonne.km	11.50
(iii)	Katcha Track and Track in River Bed/Nallah Bed and Choe Bed.	tonne.km	23.20

Chapter – 2

SITE CLEARANCE

Preamble:

- 1 Unless otherwise stated, the rates include sorting and disposal of unserviceable material and stacking of serviceable material with all lifts and upto a lead of 1000 m.
- 2 The rates include Tools & Plants (T&P) and scaffolding required for items of dismantling.
- 3 Carriage of dismantled materials, bushes, branches of tree, etc. has been catered with a tractor-trolley of 3 tonnes capacity with manual loading and unloading @ 2 trips per hour within a lead of 1000 m. This will be economical for such works as compared with a tipper.
- 4 The dismantling of structures has been catered both by manual and mechanical means. The Engineer can use his discretion depending upon quantum of work and particular site conditions.
- 5 Rate analysis for removing of stumps and roots has also been provided separately.
- 6 Dismantling of Hume pipes has been catered manually as pipes can be easily rolled by men to a suitable stacking place within the right-of-way.
- 7 For dismantling of structures, which remain submerged in water, the cost may be enhanced by 50 per cent. If site conditions warrant lowering of water level to facilitate dismantling, the cost may be enhanced by additional 25 per cent.
- 8 Dismantling of utilities, like, water supply lines, electric and telephone lines is required to be done under the supervision of concerned departments with prior information to the user public.
- 9 In certain items of dismantling, like, pipe culverts, utilities, etc. excavation in earth and dismantling of masonry works is not included in this analysis for which suitable notes have been inserted in respective Chapters. These items are required to be priced separately based on actual quantities at site and nature of work.
- 10 The dismantled materials should be examined and a realistic assessment and provision should be made after due process for the salvage value for such materials, which can be utilized for works or auctioned.
- 11 In case where lead for disposal is more than 1000 m, extra cost of carriage is required to be added based on tonne-kilometerage as per Chapter 1.
- 12 All minor Tools & Plants (T&P) items required for dismantling have been considered to have been included in overhead charges.

Summary of Rate Analysis

CHAPTER-2

SITE CLEARANCE

Item No.	Descriptions	Unit	Rate
2.1	Cutting of Trees, including Cutting of Trunks, Branches and Removal (Cutting of trees, including cutting of trunks, branches and removal of stumps, roots, stacking of serviceable material with all lifts and up to a lead of 1000 mtrs and earth filling in the depression/pit.)		
(i)	Girth from 300 mm to 600 mm	each	240.00
(ii)	Girth from 600 mm to 900 mm	each	442.00
(iii)	Girth from 900 mm to 1800 mm	each	841.00
2.2	Clearing Grass and Removal of Rubbish	hectare	15851.00
2.3	Clearing and Grubbing Road Land .(Clearing and grubbing road land including uprooting rank vegetation, grass, bushes, shrubs, saplings and trees girth up to 300 mm, removal of stumps of trees cut earlier and disposal of unserviceable materials and stacking of serviceable material to be used or auctioned up to a lead of 1000 metres including removal and disposal of top organic soil not exceeding 150 mm in thickness.)		
(i)	By Manual Means:-		
A	In area of light jungle	hectare	48070.00
B	In area of thorny jungle	hectare	64437.00
(ii)	By Mechanical Means		
A	In area of light jungle	hectare	47765.00
B	In area of thorny jungle	hectare	57853.00
2.4	Dismantling of Structures (Dismantling of existing structures like culverts, bridges, retaining walls and other structure comprising of masonry, cement concrete, wood work, steel work, including T&P and scaffolding wherever necessary, sorting the dismantled material, disposal of unserviceable material and stacking the serviceable material with all lifts and lead of 1000 metres)		
(i)	Lime /Cement Concrete		
I	By Manual Means		
A	Lime Concrete, cement concrete grade M-10 and below	cum	365.00
B	Cement Concrete Grade M-15 & M-20	cum	429.00
C	Prestressed / Reinforced cement concrete grade M-20 & above	cum	1099.00
II	By Mechanical Means for items No. 202(b) & (c)		
A	Cement Concrete Grade M-15 & M-20	cum	585.00
B	Prestressed / Reinforced cement concrete grade M-20 & above	cum	975.00
(ii)	Dismantling Brick / Tile work		
A	In lime mortar	cum	238.00
B	In cement mortar	cum	302.00
C	In mud mortar	cum	213.00

	D Dry brick pitching or brick soling	cum	200.00
(iii)	Dismantling Stone Masonry		
	A Rubble stone masonry in lime mortar	cum	264.00
	B Rubble stone masonry in cement mortar.	cum	302.00
	C Rubble Stone Masonry in mud mortar.	cum	238.00
	D Dry rubble masonry	cum	226.00
	E Dismantling stone pitching/ dry stone spalls.	cum	213.00
	F Dismantling boulders laid in wire crates including opening of crates and stacking dismantled materials.	cum	238.00
(iv)	Wood work wrought framed and fixed in frames of trusses upto a height of 5 m above plinth level	cum	565.00
(v)	Steel work in all types of sections upto a height of 5 m above plinth level excluding cutting of rivet.		
	A Including dismembering	tonne	1411.00
	B Excluding dismembering.	tonne	1038.00
	C Extra over item No(V) A and(V) B for cutting rivets.	tonne	11.00
(vi)	Scraping of bricks dismantled from brick work including stacking.		
	A In lime/Cement mortar	1000 numbers	1110.00
	B In mud mortar	1000 numbers	396.00
(vii)	Scraping of Stone from dismantled stone masonry		
	A In cement and lime mortar	cum	445.00
	B In Mud mortar	cum	94.00
(viii)	Scarping plaster in lime or cement mortar from brick/ stone masonry	sqm	14.00
(ix)	Removing all type of hume pipes and stacking within a lead of 1000 metres including earthwork and dismantling of masonry works.		
	A Up to 600 mm dia	metre	165.00
	B Above 600 mm to 900 mm dia	metre	223.00
	C Above 900 mm	metre	381.00
2.5	Dismantling of Flexible Pavements (Dismantling of flexible pavements and disposal of dismantled materials up to a lead of 1000 metres, stacking serviceable and unserviceable materials separately)		
	I By Manual Means		
	A Bituminous courses	cum	672.00
	B Granular courses	cum	488.00
	II By Mechanical Means		
	A Bituminous course	cum	298.00
2.6	Dismantling of Cement Concrete Pavement (Dismantling of cement concrete pavement by mechanical means using pneumatic tools, breaking to pieces not exceeding 0.02 cum in volume and stock piling at designated locations and disposal of dismantled materials up to a lead of 1000 metres, stacking serviceable and unserviceable materials separately)	cum	1311.00

2.7	Dismantling Guard Rails (Dismantling guard rails by manual means and disposal of dismantled material with all lifts and up to a lead of 1000 metres, stacking serviceable materials and unserviceable materials separately.)	metre	73.00
2.8	Dismantling Kerb Stone (Dismantling kerb stone by manual means and disposal of dismantled material with all lifts and up to a lead of 1000 metre)	metre	15.00
2.9	Dismantling Kerb Stone channel (Dismantling kerb stone channel by manual means and disposal of dismantled material with all lifts and up to a lead of 1000 metre)	metre	23.00
2.10	Dismantling Kilometre Stone (Dismantling of kilometre stone including cutting of earth, foundation and disposal of dismantled material with all lifts and lead upto 1000 m and back filling of pit.)		
A	5th KM stone	each	352.00
B	Ordinary KM Stone	each	210.00
C	Hectometre Stone	each	42.00
2.11	Dismantling of Fencing (Dismantling of barbed wire fencing/ wire mesh fencing including posts, foundation concrete, back filling of pit by manual means including disposal of dismantled material with all lifts and up to a lead of 1000 metres, stacking serviceable material and unserviceable material separately.)	metre	47.00
2.12	Dismantling of CI Water Pipe Line (Dismantling of CI water pipe line 600 mm dia including disposal with all lifts and lead upto 1000 metres and stacking of serviceable material and unserviceable material separately under supervision of concerned department)	metre	117.00
2.13	Removal of Cement Concrete Pipe of Sewer Gutter (Removal of cement concrete pipe of sewer gutter 1500 mm dia under the supervision of concerned department including disposal with all lifts and up to a lead of 1000 metres and stacking of serviceable and unserviceable material separately but excluding earth excavation and dismantling of masonry works.)	metre	173.00
2.14	Removal of Telephone / Electric Poles and Lines (Removal of telephone / Electric poles including excavation and dismantling of foundation concrete and lines under the supervision of concerned department, disposal with all lifts and up to a lead of 1000 metres and stacking the serviceable and unserviceable material separately)	each	165.00

Chapter – 3**EARTHWORK, EROSION CONTROL AND DRAINAGE****Preamble:**

- 1 The rates have been analysed using mechanical means. Manual means for certain items have also been provided which can be used for areas inaccessible to machines and also for small jobs.
- 2 In the rate analyses of earthwork, compacted volume of earth has been considered.
- 3 Cutting of earth by dozer has been proposed where the cut earth can be utilized for filling for embankment within a lead upto 100 m.
- 4 Where lead for transporting of earth is more than 100 m, excavator and tipper have been provided.
- 5 The rate caters for disposal of unsuitable soil only upto a distance of 1 km. The cost of transportation beyond the initial lead of 1 km will be paid separately based on tonne-kilometerage.
- 6 The replacement of unsuitable soil by suitable soil shall be provided separately in the estimate. The rate analysis for removal of unsuitable soil does not provide for replacement by suitable soil.
- 7 In cases where embankment is constructed with earth taken from roadway, the cost of depositing the earth at the site of embankment is already included in the disposal of excavated earth and, therefore, the input of dozer for spreading earth can be deleted.
- 8 For narrow and restricted areas, plate compactor has been proposed for compaction to achieve the desired density.
- 9 In case excavated rock is found suitable for incorporation in works, suitable credit for the available rock shall be given.
- 10 For excavation of structures refer to Chapter 11 dealing with items of Foundation.
- 11 The possibility of using the blasted rock fragments for backfilling behind structures or backfilling of foundation pits or filling in medians/separators or use in service road shall be examined before proposing disposal of excavated rock.
- 12 For inhabited areas, controlled blasting with limited charges of explosives has been provided. This involves smaller drill holes and additional requirement of electric detonators. Provision has been made accordingly.
- 13 Any work involved for crossing of water courses for irrigation purpose, etc. will be priced under respective items, like, excavation, grubbing, clearing, etc. for which rate analysis have separately been made.
- 14 Earth excavated from drains can be used in roadway berms. Hence carriage for disposal of same is not provided.
- 15 In case of rock fill embankment, it is assumed that material is available at site from rock cutting.

Summary of Rate Analysis

CHAPTER-3

EARTH WORK, EROSION CONTROL AND DRAINAGE

Item No.	Descriptions	Unit	Rate
3.1	Excavation in Soil by Manual Means. (Excavation for roadway in soil using manual means including loading in truck for carrying of cut earth to embankment site with all lifts and lead upto 1000 metres.)	cum	177.00
3.2	Excavation in ordinary rock by manual means (Excavation in ordinary rock using manual means including loading in a truck and carrying of excavated material to embankment site with in all lifts and leads upto 1000 metres)	cum	243.00
3.3	Excavation in Soil with Dozer with lead upto 100 metres (Excavation for road way in soil by mechanical means including cutting and pushing the earth to site of embankment upto a distance of 100 metres (average lead 50 metres), including trimming bottom and side slopes in accordance with requirements of lines, grades and cross sections.)	cum	157.00
3.4	Excavation in Ordinary Rock with Dozer with lead upto 100 metres (Excavation for roadway in ordinary rock by deploying a dozer, 80 HP including cutting and pushing the cut earth to site of embankment upto a distance of 100 metres (average lead 50 metres), trimming bottom and side slopes in accordance with the requirements of lines, grades and cross sections.)	cum	264.00
3.5	Excavation in Hard Rock (requiring blasting) with disposal upto 1000 metres (Excavation for roadway in hard rock (requiring blasting) by drilling, blasting and breaking, trimming of bottom and side slopes in accordance with requirements of lines, grades and cross sections, loading and disposal of cut road with in all lifts and leads upto 1000 metres)	cum	227.00
3.6	Excavation in Soil using Hydraulic Excavator CK 90 and Tippers with disposal upto 1000 metres. (Excavation for roadwork in soil with hydraulic excavator of 0.9 cum bucket capacity including cutting and loading in tippers, trimming bottom and side slopes, in accordance with requirements of lines, grades and cross sections, and transporting to the embankment location within all lifts and lead upto 1000m)	cum	71.00
3.7	Excavation in Ordinary Rock using Hydraulic Excavator CK-90 and Tippers with disposal upto 1000 metres. (Excavation for roadway in ordinary rock with hydraulic excavator of 0.9 cum bucket capacity including cutting and loading in tippers, transporting to embankment site within all lifts and lead upto 1000 m, trimming bottom and side slopes in accordance with requirements of lines, grades and cross sections.)	cum	89.00

3.8	Excavation in Hard Rock (blasting prohibited) (Excavation for roadway in hard rock (blasting prohibited) with rock breakers including breaking rock, loading in tippers and disposal within all lifts and lead upto 1000 metres, trimming bottom and side slopes in accordance with requirements of lines, grades and cross sections.)		
A	Mechanised	cum	418.00
B	Manual Method	cum	928.00
3.9	Excavation in Hard Rock (controlled blasting) with disposal upto 1000 metres (Excavation for roadway in hard rock with controlled blasting by drilling, blasting and breaking, trimming of bottom and side slopes in accordance with requirements of lines, grades and cross sections, loading and disposal of cut road with in all lifts and leads upto 1000 metres)	cum	284.00
3.10	Excavation in Marshy Soil (Excavation for roadway in marshy soil with hydraulic excavator 0.9 cum bucket capacity including cutting and loading in tippers and disposal with in all lifts and lead upto 1000 metres, trimming of bottom and side slopes in accordance with requirements of lines, grades and cross sections.)	cum	79.00
3.11	Removal of Unserviceable Soil with Disposal upto 1000 metres (Removal of unserviceable soil including excavation, loading and disposal upto 1000 metres lead but excluding replacement by suitable soil which shall be paid separately as per clause 305.)	cum	72.00
3.12	Pre-splitting of Rock Excavation Slopes (Carrying out excavation in hard rock to achieve a specified slope of the rock face by controlled use of explosives and blasting accessories in properly aligned and spaced drill holes, collection of the excavated rock by a 80 HP dozer, loading in tipper by a front end loader and disposing of the material with all lifts and lead upto 1000 m, all as specified in clause No. 303)	sqm	152.00
3.13	Excavation for Structures (Earth work in excavation of foundation of structures as per drawing and technical specification, including setting out, construction of shoring and bracing, removal of stumps and other deleterious matter, dressing of sides and bottom, backfilling the excavation earth to the extent required and utilising the remaining earth locally for road work.)		
(i)	Ordinary soil		
A	Manual Means (Depth upto 3 m)	cum	254.00
B	Mechanical Means (Depth upto 3 m)	cum	46.00
(ii)	Ordinary rock (not requiring blasting)		
A	Manual Means (Depth upto 3 m)	cum	317.00
B	Mechanical Means	cum	62.00
(iii)	Hard rock (requiring blasting)		
A	Manual Means	cum	548.00
(iv)	Hard rock (blasting prohibited)		
A	Mechanical Means	cum	783.00
(v)	Marshy soil		
A	Manual means (upto 3 m depth)	cum	564.00
B	Mechanical Means	cum	243.00

3.14	Scarifying Existing Granular Surface to a Depth of 50 mm by Manual Means (Scarifying the existing granular road surface to a depth of 50 mm and disposal of scarified material within all lifts and leads upto 1000 metres.)	sqm	24.00
3.15	Scarifying existing bituminous surface to a depth of 50 mm by mechanical means (Scarifying the existing bituminous road surface to a depth of 50 mm and disposal of scarified material with in all lifts and lead upto 1000 metres.)	sqm	6.00
3.16	Embankment Construction with Material Obtained from Borrow Pits (Construction of embankment with approved material obtained from borrow pits with all lifts and leads, transporting to site, spreading, grading to required slope and compacting to meet requirement of table 300-2)	cum	182.00
3.17	Construction of Embankment with Material Deposited from Roadway Cutting (Construction of embankment with approved materials deposited at site from roadway cutting and excavation from drain and foundation of other structures graded and compacted to meet requirement of table 300-2)	cum	105.00
3.18	Construction of Subgrade and Earthen Shoulders (Construction of subgrade and earthen shoulders with approved material obtained from borrow pits with all lifts & leads, transporting to site, spreading, grading to required slope and compacted to meet requirement of table No. 300-2)	cum	220.00
3.19	Compacting Original Ground		
Case-I	Compacting original ground supporting subgrade (Loosening of the ground upto a level of 500 mm below the subgrade level, watered, graded and compacted in layers to meet requirement of table 300-2 for subgrade construction.)	cum	57.00
Case-II	Compacting original ground supporting embankment	cum	22.00
3.20	Stripping and Storing Top Soil (Stripping, storing of top soil by road side at 15 m interval and re-application on embankment slopes, cut slopes and other areas in localities where the available embankment material is not conducive to plant growth)	cum	204.00
3.21	Stripping, storing and re-laying top soil from borrow areas in agriculture fields. (Stripping of top soil from borrow areas located in agriculture fields, storing at a suitable place, spreading and re-laying after taking the borrow earth to maintain fertility of the agricultural field, finishing it to the required levels and satisfaction of the farmer.)	cum	94.00
3.22	Turfing with Sods (Furnishing and laying of the live sods of perennial turf forming grass on embankment slope, verges or other locations shown on the drawing or as directed by the engineer including preparation of ground, fetching of rods and watering)	sqm	35.00
3.23	Seeding and Mulching (Preparation of seed bed on previously laid top soil, furnishing and placing of seeds, fertilizer, mulching material, applying bituminous emulsion at the rate of 0.23 litres per sqm and laying and fixing jute netting, including watering for 3 months all as per clause 308)	sqm	113.00
3.24	Surface Drains in Soil (Construction of unlined surface drains of average cross sectional area 0.40 sqm in soil to specified lines, grades, levels and dimensions to the requirement of clause 301 and 309. Excavated material to be used in embankment within a lead of 50 metres (average lead 25 metres))		

A	Mechanical means	metre	71.00
B	Manual Means	metre	63.00
3.25	Surface Drains in Ordinary Rock (Construction of unlined surface drain of average cross sectional area 0.4 sqm in ordinary rock to specified lines, grades, levels and dimensions as per approved design and to the requirement of clause 301 to 309. Excavated material to be used in embankment at site.)		
A	Mechanical Means	metre	143.00
B	Manual Means	metre	95.00
3.26	Surface Drains in Hard Rock (Rate per metre may be worked out based on quantity of hard rock as per design.)	metre	
3.27	Sub Surface Drains with Perforated Pipe (Construction of subsurface drain with perforated pipe of 100 mm internal diameter of metal/ asbestos cement/ cement concrete/PVC, closely jointed, perforations ranging from 3 mm to 6 mm depending upon size of material surrounding the pipe, with 150 mm bedding below the pipe and 300 mm cushion above the pipe, cross section of excavation 450 x 550 mm. Excavated material to be utilised in roadway at site)		499.00
3.28	Aggregate Sub- Surface Drains (Construction of aggregate sub surface drain 300 mm x 450 mm with aggregates conforming to table 300-4, excavated material to be utilised in roadway)	metre	234.00
3.29	Underground Drain at Edge of Pavement (Construction of an underground drain 1 m x 1 m (inside dimensions) lined with RCC-20 cm thick and covered with RCC slab 10 cm in thickness on urban roads)	metre	3517.00
3.30	Preparation and Surface Treatment of formation. (Preparation and surface treatment of formation by removing mud and slurry, watering to the extent needed to maintain the desired moisture content, trimming to the required line, grade, profile and rolling with 8-10 tonne smooth wheeled roller, complete as per clause 310.)	sqm	2.00
3.31	Construction of Rock fill Embankment (Construction of rock fill embankment with broken hard rock fragments of size not exceeding 300 mm laid in layers not exceeding 500 mm thick including filling of surface voids with stone spalls, blinding top layer with granular material, rolled with vibratory road roller, all complete as per clause 313)	cum	56.00
3.32 (i)	Excavation in Hill Area in Soil by Mechanical Means (Excavation in soil in hilly area by mechanical means including cutting and trimming of side slopes and disposing of excavated earth with all lifts and lead upto 1000 metres)	cum	155.00
3.32 (ii)	Depositing of excavated earth on the barren valley side. (Excavation in soil in hilly area by mechanical means including cutting and trimming of side slopes and disposing of excavated earth on the Barren Valley side)	cum	81.00
3.33 (i)	Excavation in Hilly Area in Ordinary Rock by Mechanical Means not Requiring Blasting. (Excavation in hilly area in ordinary rock not requiring ballasting by mechanical means including cutting and trimming of slopes and disposal of cut material with all lift and lead upto 1000 metres)	cum	225.00

3.33 (ii)	Disposal of excavated earth on the barren valley side. (Excavation in hilly area in ordinary rock not requiring blasting by mechanical means including cutting and trimming of slopes and disposal of excavated earth on the barren valley side)	cum	127.00
3.34	Excavation in Hilly Areas in Hard Rock Requiring Blasting (Excavation in hilly areas in hard rock requiring blasting, by mechanical means including trimming of slopes and disposal of cut material with all lifts and lead upto 1000 metres.)	cum	298.00
3.35 (i) A	Excavation in Hilly Areas in Soil by Manual Means (Excavation in soil in Hilly Area by Manual Means including cutting and trimming of side slopes and disposing of excavated earth with a lift upto 1.5 m and a lead upto 20 m as per drawing and Technical Specification Clause 1603.1)	cum	159.00
3.35 (i) B	Deduct for quantum of earthwork of all types disposal directly by throwing into the valley without involving any lead and lift (Ordinary and Hard Soil/Hard Shale, Soil containing shingle or small size boulders.	cum	60.00
3.35 (ii) A	Excavation in Hilly Area in Ordinary Rock by Manual Means (Excavation in Ordinary Rock using Manual Means including loading in a truck and carrying of excavated material to embankment site with a lift upto 1.5 m and lead upto 20 m as per Clause 1603.2.)	cum	349.00
3.35 (ii) B	Deduct for quantum of earthwork of all types disposal directly by throwing into the valley without involving any lead and lift. (Ordinary and Hard Rock)	cum	96.00

Chapter – 4**SUB-BASES, BASES (NON-BITUMINOUS) AND SHOULDERS****Preamble:**

- 1 Quantities of materials provided are approximate and are meant for the purpose of estimating only. Actual quantities shall be as per mix design.
- 2 For construction of sub-base, two alternatives as under have been provided.
 - a. Mix in place method
 - b. Plant mix method
- 3 Construction of shoulders: - Earthen, Hard and Paved shoulders have been considered, the rates applicable are for subgrade, sub-base and different layers of pavement respectively.
- 4 In the case of improvement of subgrade with lime stabilization, soil is assumed to be available at the site and has not been provided for. Only lime has been catered. In the case of lime stabilization of sub-base, soil has been provided to form the sub-base.
- 5 While providing for the rate of materials, detailed local enquires should be made and prevailing market rates ascertained from concerned suppliers in the area keeping in view the location of crushing plants and lead involved.
- 6 The quantities considered in the output are the compacted quantities. The quantities of aggregates provided in the rate analysis under the head material are the uncompacted quantities.

Summary of Rate Analysis

CHAPTER-4

SUB-BASES, BASES (NON- BITUMINOUS) AND SHOULDERS

Item No.	Descriptions	Unit	Rate
4.1	Granular Sub-base with Close Graded Material (Table:- 400-1)		
A	Plant Mix Method (Construction of granular sub-base by providing close graded Material, mixing in a mechanical mix plant at OMC, carriage of mixed Material to work site, spreading in uniform layers with motor grader on prepared surface and compacting with vibratory power roller to achieve the desired density, complete as per clause 401)		
(i)	for grading- I Material	cum	1349.00
(ii)	for grading- II Material	cum	1220.00
(iii)	for grading-III Material	cum	1205.00
B	By Mix in Place Method (Construction of granular sub-base by providing close graded material, spreading in uniform layers with motor grader on prepared surface, mixing by mix in place method with rotavator at OMC, and compacting with vibratory roller to achieve the desired density, complete as per clause 401)		
(i)	for grading- I Material	cum	1200.00
(ii)	for grading- II Material	cum	1071.00
(iii)	for grading-III Material	cum	1056.00
4.2	Granular Sub-Base with Coarse Graded Material (Table:- 400- 2) (Construction of granular sub-base by providing coarse graded material, spreading in uniform layers with motor grader on prepared surface, mixing by mix in place method with rotavator at OMC, and compacting with vibratory roller to achieve the desired density, complete as per clause 401)		
(i)	for grading- I Material	cum	1223.00
(ii)	for grading- II Material	cum	1131.00
(iii)	for grading-III Material	cum	1061.00
4.3	Lime Stabilisation for Improving Subgrade (Laying and spreading available soil in the subgrade on a prepared surface, pulverising, mixing the spread soil in place with rotavator with 3 % slaked lime having minimum content of 70% of CaO, grading with motor grader and compacting with the road roller at OMC to the desired density to form a layer of improved sub grade)		
A	By Mechanical Means	cum	877.00
B	By Manual Means	cum	877.00

4.4	Lime Treated Soil for Sub- Base (Providing, laying and spreading soil on a prepared sub grade, pulverising, mixing the spread soil in place with rotavator with 3 % slaked lime with minimum content of 70% of CaO, grading with motor grader and compacting with the road roller at OMC to achieve at least 98% of the max dry density to form a layer of sub base.)	cum	972.00
4.5	Cement Treated Soil Sub Base/ Base (Providing, laying and spreading soil on a prepared sub grade, pulverising, adding the designed quantity of cement to the spread soil, mixing in place with rotavator, grading with the motor grader and compacting with the road roller at OMC to achieve the desired unconfined compressive strength and to form a layer of sub-base/base.)	cum	926.00
4.8	Inverted Choke (Construction of inverted choke by providing, laying, spreading and compacting screening B type/ coarse sand of specified grade in uniform layer on a prepared surface with motor grader and compacting with power roller etc)	cum	867.00
4.9	Water Bound Macadam (Providing, laying, spreading and compacting stone aggregates of specific sizes to water bound macadam specification including spreading in uniform thickness, hand packing, rolling with vibratory roller 8-10 tonnes in stages to proper grade and camber, applying and brooming requisite type of screening/ binding Materials to fill up the interstices of coarse aggregate, watering and compacting to the required density.)		
A	By Manual Means		
(i)	Grading- I (Using Screening Crushable type such as Moorum or Gravel)		
(a)	Using Screening Crushable type such as Moorum or Gravel	cum	1540.00
(b)	Using Screening Type-A (13.2mm Agg.)	cum	2029.00
(ii)	Grading- II (Using Screening Crushable type such as Moorum or Gravel)		
(a)	Using Screening Crushable type such as Moorum or Gravel	cum	1570.00
(b)	Using Screening Type-A (13.2mm Agg.)	cum	1835.00
(c)	Using Screening Type-B (11.2mm Agg.)	cum	2014.00
(iii)	Grading- III (Using Screening Crushable type such as Moorum or Gravel)		
(a)	Using Screening Crushable type such as Moorum or Gravel	cum	1603.00
(b)	Using Screening Type-B (11.2mm Agg.)	cum	2046.00
B	By Mechanical Means:		
(i)	Grading- I (Using Screening Crushable type such as Moorum or Gravel)		
(a)	Using Screening Crushable type such as Moorum or Gravel	cum	1397.00
(b)	Using Screening Type-A (13.2mm Agg.)	cum	1886.00
(ii)	Grading- II (Using Screening Crushable type such as Moorum or Gravel)		
(a)	Using Screening Crushable type such as Moorum or Gravel	cum	1427.00
(b)	Using Screening Type-A (13.2mm Agg.)	cum	1691.00
(c)	Using Screening Type-B (11.2mm Agg.)	cum	1871.00
(iii)	Grading- III (Using Screening Crushable type such as Moorum or Gravel)		

(a)	Using Screening Crushable type such as Moorum or Gravel	cum	1459.00
(b)	Using Screening Type-B (11.2mm Agg.)	cum	1903.00
4.10	Crushed Cement Concrete Sub-base / Base (Breaking and crushing of material obtained by breaking damaged cement concrete slabs to size range not exceeding 75 mm as specified in table 400.7 transporting the aggregates obtained from breaking of cement concrete slabs at a lead of L km., laying and compacting the same as sub base/ base course, constructed as WBM to clause 404 except the use of screening or binding Material.)	cum	218.00
4.11	Penetration Coat Over Top Layer of Crushed Cement Concrete Base (Spraying of bitumen over cleaned dry surface of crushed cement concrete base at the rate of 25 kg per 10 sqm by a bitumen pressure distributor, spreading of key aggregates at the rate of 0.13 cum per 10 sqm by a mechanical gritter and rolling the surface as per clause 506.3.8)	sqm	37.00
4.12	Wet Mix Macadam (Providing, laying, spreading and compacting graded stone aggregate to wet mix macadam specification including premixing the Material with water at OMC in mechanical mix plant carriage of mixed Material by tipper to site, laying in uniform layers with paver in sub- base / base course on well prepared surface and compacting with vibratory roller to achieve the desired density.)	cum	1455.00
4.13	Construction of Median and Island with Soil Taken from Roadway Cutting (Construction of Median and Island above road level with approved material deposited at site from roadway cutting and excavation for drain and foundation of other structures, spread, graded and compacted as per clause 407)	cum	244.00
4.14	Construction of Median and Island with Soil Taken from Borrow Areas (Construction of median and Island above road level with approved material brought from borrow pits, spread, sloped and compacted as per clause 407)	cum	328.00
4.15	Construction of Shoulders (A. Earthen Shoulders)		
4.17	Crusher Run Macadam Base (Providing crushed stone aggregate, depositing on a prepared surface by hauling vehicles, spreading and mixing with a motor grader, watering and compacting with a vibratory roller to clause 410 to form a layer of sub-base/Base)		
A By Mix in Place Method			
(i)	For 53 mm maximum size	cum	2147.00
(ii)	For 45 mm maximum size	cum	2445.00
B By Mixing Plant :			
(i)	For 53 mm maximum size	cum	2290.00
(ii)	For 45 mm maximum size	cum	1621.00

4.18 (A)	Preparation of sub grade (Preparation of sub grade by excavating earth to an average depth of 22.50 cm, dressing to camber and consolidating with road roller, making good the undulations etc. and disposal of surplus earth, lead upto 50 m.)	sqm	65.00
4.18 (B)	Consolidation of sub-grade with road roller of 8 to 12 tonne capacity including making good the undulations etc. with earth or quarry spoils etc. and rerolling the sub grade.	sqm	3.60

Chapter – 5

BASES AND SURFACE COURSES (BITUMINOUS)

Preamble:

- 1 Various alternatives for machines and materials have been provided. The one that suits a particular situation and design may be adopted.
- 2 The outputs considered for construction equipment are for compacted quantities of relevant items and not for loose quantities.
- 3 In case of prime coat and tack coat, average quantities of binder indicated in specifications have been taken.
- 4 Tack coat and prime coat, wherever provided, are required to be measured and paid separately.
- 5 Cleaning of surface is a part of the item of prime coat and tack coat. As such cleaning of surface has not been provided for bituminous courses as the same is already catered in prime/tack coat. However, for those cases where such coats are not required to be done, cleaning of surface shall be included and paid.
- 6 Rolling of bituminous courses is required to be done as per Clause 501.6 of MORD Specifications. Provision in the analysis has been made accordingly. It has been observed during actual practice at work sites, that the availability of road roller is generally inadequate. As compaction is the key to good construction, this point is being specifically highlighted to ensure that adequate number of road rollers as per provision in the rate analysis are deployed at site.
- 7 Spreading of bituminous materials shall be done by mechanical means except in areas where a mechanical paver cannot have access.
- 8 Hot Mazdoor is the one who work for Bitumen heating/spreading or spreading of hot bituminous mix. He will be paid the same wages. However, he will be provided safety kits containing normally gumboots, hand gloves, dark goggles, barnol, country soap, coconut oil, tarring outfits, etc. For this purpose, additional 0.5 per cent sundries have been provided in the analysis of rates in addition to the normal sundries covered by overheads.
- 9 Where the proposed aggregates fail to pass the stripping value test, an approved adhesion agent shall be added to the binder as per Clause 507.2.4 with the approval of the Engineer and cost of the adhesion agent shall be added under the subhead of materials.
- 10 The Factor for usage of rollers has been taken as 0.65 in case of Bituminous Macadam only.

Summary of Rate Analysis

CHAPTER-5

BASES AND SURFACE COURSES (BITUMINOUS)

Item No.	Descriptions	Unit	Rate
5.1	Prime coat (Providing and applying primer coat with bitumen emulsion on prepared surface of granular Base including clearing of road surface and spraying primer at the rate of 0.60 kg/sqm using mechanical means.)	sqm	33.00
5.2	Tack coat		
	Providing and applying tack coat with bitumen emulsion using emulsion pressure distributor at the rate of 0.20 kg per sqm on the prepared bituminous/granular surface cleaned with mechanical broom.	sqm	12.00
5.3	Bituminous Macadam (Providing and laying bituminous macadam with 100-120 TPH hot mix plant producing an average output of 75 tonnes per hour using crushed aggregates of specified grading premixed with bituminous binder, transported to site, laid over a previously prepared surface with paver finisher to the required grade, level and alignment and rolled as per clauses 501.6 and 501.7 to achieve the desired compaction)		
(i)	for Grading I (40 mm nominal size)	cum	8127.00
(ii)	for Grading II (19 mm nominal size)	cum	8383.00
5.4	Bituminous Penetration Macadam (Construction of penetration macadam over prepared Base by providing a layer of compacted crushed coarse aggregate using chips spreader with alternate applications of bituminous binder and key aggregates and rolling with a smooth wheeled steel roller 8-10 tonne capacity to achieve the desired degree of compaction)		
A	50 mm thick	sqm	385.00
B	75 mm thick	sqm	523.00
5.5	Built-Up-Spray Grout (Providing, laying and rolling of built-up-spray grout layer over prepared base consisting of a two layer composite construction of compacted crushed coarse aggregates using motor grader for aggregates. key stone chips spreader may be used with application of bituminous binder after each layer, and with key aggregates placed on top of the second layer to serve as a Base conforming to the line, grades and cross-section specified, the compacted layer thickness being 75 mm)	sqm	302.00

5.6	Dense Graded Bituminous Macadam (Providing and laying dense bituminous macadam with 100-120 TPH batch type HMP producing an average output of 75 tonnes per hour using crushed aggregates of specified grading, premixed with bituminous binder @ 4.0 to 4.5% by weight of total mix of mix and filler, transporting the hot mix to work site, laying with a hydrostatic paver finisher with sensor control to the required grade, level and alignment, rolling with smooth wheeled, vibratory and tandem rollers to achieve the desired compaction as per MoRTH specification clause No. 507 complete in all respects.)		
	(i) for Grading I (40 mm nominal size)	cum	10239.00
	(ii) for GradingII(19 mm nominal size)	cum	10478.00
5.7	Semi - Dense Bituminous Concrete (Providing and laying semi dense bituminous concrete with 100-120 TPH batch type HMP producing an average output of 75 tonnes per hour using crushed aggregates of specified grading, premixed with bituminous binder @ 4.5 to 5 % of mix and filler, transporting the hot mix to work site, laying with a hydrostatic paver finisher with sensor control to the required grade, level and alignment, rolling with smooth wheeled, vibratory and tandem rollers to achieve the desired compaction as per MoRTH specification clause No. 508 complete in all respects)		
	(i) for Grading I (13 mm nominal size)	cum	10895.00
	(ii) for GradingII(10 mm nominal size)	cum	11743.00
5.8	Bituminous Concrete (Providing and laying bituminous concrete with 100-120 TPH batch type hot mix plant producing an average output of 75 tonnes per hour using crushed aggregates of specified grading, premixed with bituminous binder @ 5.4 to 5.6 % of mix and filler, transporting the hot mix to work site, laying with a hydrostatic paver finisher with sensor control to the required grade, level and alignment, rolling with smooth wheeled, vibratory and tandem rollers to achieve the desired compaction as per MORTH specification clause No. 509 complete in all respects)		
	(i) for Grading-I (13 mm nominal size)	cum	11769.00
	(ii) for Grading-II(10 mm nominal size)	cum	11761.00
5.9	Surface Dressing (Providing and laying surface dressing as wearing course in single coat using crushed stone aggregates of specified size on a layer of bituminous binder laid on prepared surface and rolling with 8-10 tonne smooth wheeled steel roller)		
Case -I	19 mm nominal chipping size	sqm	110.00
Case - II	13 mm nominal size chipping	sqm	89.00
5.10	Open - Graded Premix Surfacing (Providing, laying and rolling of open - graded premix surfacing of 20 mm thickness composed of 13.2 mm to 5.6 mm aggregates either using penetration grade bitumen or cut-back or emulsion to required line, grade and level to serve as wearing course on a previously prepared base, including mixing in a suitable plant, laying and rolling with a smooth wheeled roller 8-10 tonne capacity, finished to required level and grades.)		

(i)	Case - I: Mechanical method using Penetration grade Bitumen and HMP of appropriate capacity not less than 75 tonnes/hour .	sqm	163.00
(ii)	Case - II: Open-Graded Premix Surfacing using cationic Bitumen Emulsion	sqm	173.00
5.11	Close Graded Premix Surfacing/Mixed Seal Surfacing (Mechanical means using HMP of appropriate capacity not less than 75 tonnes/hour. Providing, laying and rolling of close-graded premix surfacing material of 20 mm thickness composed of 11.2 mm to 0.09 mm (Type-a) or 13.2 mm to 0.09 mm (Type-b) aggregates using penetration grade bitumen to the required line, grade and level to serve as wearing course on a previously prepared base, including mixing in a suitable plant, laying and rolling with a Smooth wheeled roller 8-10 tonne capacity, and finishing to required level and grade)	sqm	190.00
5.12	Seal Coat (Providing and laying seal coat sealing the voids in a bituminous surface laid to the specified levels, grade and cross fall using Type A and B seal coats)		
(i)	Case - I : Type A	sqm	85.00
(ii)	Case - II : Type B (Providing and laying of premix sand seal coat with HMP of appropriate capacity not less than 75 tonnes/ hours using crushed stone chipping 6.7 mm size and penetration bitumen of suitable grade.)	sqm	63.00
5.13	Supply of Stone Aggregates for Pavement Courses (Supply of stone aggregates from approved sources confirming to the physical requirement, specified in the respective specified clauses, including royalties, fees rents, collection, transportation, stacking and testing and measured in cum as per clause 514.5 Competitive market rates to be ascertained. Alternatively, rates for stone crushing given in chapter 1 may be adopted, if found economical. In case for supply of aggregates at site are not available, nearest crusher site may be ascertained. Loading and un-loading charges and cost of carriage may be added to these rates to arrive at the cost at site.)	cum	
5.14	Mastic Asphalt (Providing and laying 25 mm thick mastic asphalt wearing course with paving grade bitumen meeting the requirements given in table 500-29, prepared by using mastic cooker and laid to required level and slope after cleaning the surface, including providing antiskid surface with bitumen precoated fine-grained hard stone chipping of 13.2 mm nominal size at the rate of 0.005cum per 10 sqm and at an approximate spacing of 10 cm center to center in both directions, pressed into surface when the temperature of surfaces not less than 100°C, protruding 1 mm to 4 mm over mastic surface, all complete as per clause 515.)	sqm	731.00
5.15	Slurry Seal Providing and laying slurry seal consisting of a mixture of fine aggregates, portland cement filler, bituminous emulsion and water on a road surface including cleaning of surface, mixing of slurry seal in a suitable mobile plant, laying and compacting to provide even riding surface)		
(i)	5 mm thickness	sqm	80.00
(ii)	3 mm thickness	sqm	50.00
(iii)	1.5 mm thickness	sqm	30.00

5.17	Fog Spray	sqm	40.00
added	1.In case it is decided by the engineer to blind the fog spray, the following may be added	sqm	5.00
5.18	Bituminous Cold Mix (Including Gravel Emulsion) (Providing, laying and rolling of bituminous cold mix on prepared base consisting of a mixture of unheated mineral aggregate and emulsified or cutback bitumen, including mixing in a plant of suitable type and capacity, transporting, laying, compacting and finishing to specified grades and levels.)		
(i)	Using bitumen emulsion and 9.5 mm or 13.2 mm nominal size aggregate	cum	12447.00
(ii)	Using bitumen emulsion and 19 mm or 26.5 mm nominal size aggregate	cum	12098.00
(iii)	Using cutback bitumen and 9.5 mm or 13.2 mm nominal size aggregate	cum	10739.00
(iv)	Using cutback bitumen and 19 mm or 26.5 mm nominal size aggregate	cum	10391.00
5.19	Sand Asphalt Base Course (Providing, laying and rolling sand-asphalt base course composed of sand, mineral filler and bituminous binder on a prepared sub-grade or sub-base to the lines, levels, grades and cross sections as per the drawings including mixing in a plant of suitable type and capacity, transporting, laying, compacting and finishing.)	cum	9172.00
5.20	Modified Binder (Supply of modified binder produced by mixing bitumen with modifier such as natural rubber or crumb rubber or any other polymer found compatible with bitumen and which allows properties given in clause 521.3 and IRC: SP: 53 blending of modifier with bitumen to be done either at the refinery or at the site plant capable of producing the modified binder to be delivered in drums which shall be agitated in melted condition using suitable device before use to ensure uniform dispersion.)	tonne	
5.21	Crack Prevention Courses		
(i)	Stress Absorbing Membrane (SAM) crack width less than 6 mm (Providing and laying of a stress absorbing membrane over a cracked road surface, with crack width below 6 mm after cleaning with a mechanical broom, using modified binder complying with clause 521, sprayed at the rate of 9 kg per 10 sqm and spreading 5.6 mm crushed stone aggregates @ 0.11 cum per 10 sqm with hydraulic chip spreader, sweeping the surface for uniform spread of aggregates and surface finished to conform to clause 902.)	sqm	76.00
(ii)	Stress Absorbing Membrane (SAM) with crack width 6 mm to 9 mm (Providing and laying of a stress absorbing membrane over a cracked road surface, with crack width 6 to 9 mm after cleaning with a mechanical broom, using modified binder complying with clause 521, sprayed at the rate of 11 kg per 10 sqm and spreading 11.2 mm crushed stone aggregates @ 0.12 cum per 10 sqm, sweeping the surface for uniform spread of aggregates and surface finished to conform to clause 902.)	sqm	88.00

(iii)	Stress Absorbing Membrane (SAM) crack width above 9 mm and cracked area above 50 % (Providing and laying a single coat of a stress absorbing membrane over a cracked road surface, with crack width above 9 mm and cracked area above 50 % after cleaning with a mechanical broom, using modified binder complying with clause 521, sprayed at the rate of 15 kg per 10 sqm and spreading 11.2 mm crushed stone aggregates @ 0.12 cum per 10 sqm, sweeping the surface for uniform spread of aggregates and surface finished to conform to clause 902.)	sqm	115.00
5.22	Recipe Cold Mix (Providing and laying of premix of crushed stone aggregates and emulsion binder, mixed in a batch type cold mixing plant, laid over prepared surface, by paver finisher, rolled with a pneumatic tyred roller initially and finished with a smooth steel wheel roller, all as per clause 519.3)		
(i)	75 mm thickness	cum	8165.00
(ii)	40 mm thickness	cum	11660.00
(iii)	25 mm thickness	cum	13237.00
5.23	Open - Graded Premix Surfacing		
	MORD – 508.2 ; IRC : SP : 100 – 2004, chapter 6.5 Using CRRI-BitChem Cold Mix Binder (Exceeds IS 8887 : 2004 of SS-2) Providing , laying and rolling open graded premix carpet of 20mm thickness composed of 13.2 mm to 5.6 mm aggregates using CRRI-BitChem Cold Mix Binder (Tailor made) to requires line, grade and level to serve as wearing course on a previously prepared base, including mixing in a suitable plant, laying and rolling with a three wheel 80-100 KN static roller capacity, finished to required level and grades to be followed by seal coat (Application: CRRI-BitChem Cold OGPC as per Designmix & Implementation by Manufacturer's discretion ony)	sqm	211.00
5.24.1	Seal Coat		
	MORD – 510 ; IRC : SP : 100 – 2004, chapter 6.5 & 6.2 Using CRRI-BitChem Cold Mix Binder (Exceeds IS 8887 : 2004 of SS-2) Providing , laying & rolling of seal coat sealing the voids in a bituminous surface laid to the specified levels, grade and cross fall using CRRI-BitChem Cold Mix Binder and stone chips passing 6.3 mm IS sieve (Application: CRRI-BitChem Seal Coat (A), Liquid Seal Coat as per Designmix & Implementation by Manufacturer's discretion ony)	sqm	114.00
5.24.2	MORD – 510 ; IRC : SP : 100 – 2004, chapter 6.5 Using CRRI-BitChem Cold Mix Binder (Exceeds IS 8887 : 2004 of SS-2) Providing , laying & rolling of seal coat sealing the voids in a bituminous surface laid to the specified levels, grade and cross fall using CRRI-BitChem Cold Mix Binder and stone chips passing 9.5 mm IS sieve & retain on 2.36 mm IS sieve (Application: Premix Seal Coat (C) as per Designmix & Implementation by Manufacturer's discretion ony)	sqm	91.00
5.25.1	Close Graded Premix Surfacing/Mixed Seal Surfacing		

	MORTH – 511 ; IRC : SP : 100 – 2004, chapter 6.6 Using CRRI-BitChem Cold Mix Binder (Exceeds IS 8887 : 2004 of SS-2) Providing, laying and rolling of close graded premix surfacing material of 20 mm thickness composed of 11.2 mm to 0.09 mm (Type A) or 13.2 mm to 0.09 mm (Type B) aggregates using CRRI-BitChem Cold Mix Binder to the required line, grade and level to serve as wearing course on a previously prepared base, including mixing in a suitable plant, laying and rolling with a smooth wheeled roller 8-10 ton capacity and finishing to required level and grade (Application: CRRI-BitChem Cold MSS (Mix Seal Surfacing as per Designmix & Implementation by Manufacturer's discretion only)	sqm	243.00
5.25.2	MORTH – 511 ; IRC : SP : 100 – 2004, chapter 6.6 Using CRRI-BitChem Cold Mix Binder (Exceeds IS 8887 : 2004 of SS-2) Providing, laying and rolling of close graded premix surfacing material of 20 mm thickness composed of 11.2 mm to 0.09 mm (Type A) or 13.2 mm to 0.09 mm (Type B) aggregates using CRRI-BitChem Cold Mix Binder to the required line, grade and level to serve as wearing course on a previously prepared base, including mixing in a suitable plant, laying and rolling with a smooth wheeled roller 8-10 ton capacity and finishing to required level and grade (Application: CRRI-BitChem Cold MSS (Mix Seal Surfacing as per Designmix & Implementation by Manufacturer's discretion only)	sqm	260.00
5.26	MORTH – 504 ; IRC : SP : 100 – 2004, chapter 7.1 Using CRRI-BitChem Cold Mix Binder (Exceeds IS 8887 : 2004 of SS-2)		
	Providing, laying and rolling of CRRI-BitChem cold BM (50 mm) on prepared base consisting of a mixture of unheated mineral aggregate (19 mm nominal size) and CRRI-BitChem Cold Mix Binder, including mixing in a plant of suitable type and capacity, transporting, laying, compacting and finishing to specified grades and levels (Application: CRRI-BitChem Cold BM as per Designmix & Implementation by Manufacturer's discretion only)	cum	11263.00
5.27	MORTH – 504 ; IRC : SP : 100 – 2004, chapter 7.2 Using CRRI-BitChem Cold Mix Binder (Exceeds IS 8887 : 2004 of SS-2)		
	Providing and laying of Semi Dense Bituminous Concrete with 100-120 TPH HMP producing an average output of 75 tonnes per hr using crushed aggregates of specified grading (9.5 mm nominal size), premixed with CRRI-BitChem cold mix binder @ 7.5 % by wt of mix , transporting the cold mix to work site, laying with a hydrostatic paver finisher with sensor control to required grade, level and alignment, rolling with smooth wheeled, vibratory and tandem rollers to achieve the desired compaction (Application: CRRI-BitChem Cold SDBC as per Designmix & Implementation by Manufacturer's discretion only)	cum	15191.00

Chapter – 6**CEMENT CONCRETE PAVEMENT****Preamble:**

- 1 High capacity batch mix plants of 75 cum/hour (effective output) has been considered in the rate analysis of cement concrete pavement works.
- 2 While tippers have been provided for transportation of dry lean cement concrete and rolled cement concrete, transit truck mixers have been considered for the cement concrete pavement.
- 3 Super plasticizer admixture has been provided to improve workability with reduced water cement ratio.
- 4 Cement 43 grade has been catered for the cement concrete pavement i.e., for pavement quality concrete to get higher strength. However, for dry lean concrete, cement of 33 grade may be preferred.
- 5 While a slip form paver has been catered for the top layer of concrete pavement, a mechanical paver has been provided for dry lean and roller cement concrete.
- 6 Materials provided in the rate analysis are for estimating purpose. Exact quantity of materials be determined for the job mix formula.

Summary of Rate Analysis

CHAPTER-6

CEMENT CONCRETE PAVEMENTS

Item No.	Descriptions	Unit	Rate
6.1	Dry Lean Cement Concrete Sub- base (Construction of dry lean cement concrete Sub- base over a prepared sub-grade with coarse and fine aggregate conforming to IS: 383, the size of coarse aggregate not exceeding 25 mm, aggregate cement ratio not to exceed 15:1, aggregate gradation after blending to be as per table 600-1, cement content not to be less than 150 kg/ cum, optimum moisture content to be determined during trial length construction, concrete strength not to be less than 10 Mpa at 7 days, mixed in a batching plant, transported to site, laid with a paver with electronic sensor, compacting with 8-10 tonnes vibratory roller, finishing and curing.)	cum	3741.00
6.2	Cement Concrete Pavement (Construction of un-reinforced, dowel jointed, plain cement concrete pavement over a prepared sub base with 43 grade cement @ 400 kg per cum, coarse and fine aggregate conforming to IS 383, maximum size of coarse aggregate not exceeding 25 mm, mixed in a batching and mixing plant as per approved mix design, transported to site, laid with a fixed form or slip form paver, spread, compacted and finished in a continuous operation including provision of contraction, expansion, construction and longitudinal joints, joint filler, separation membrane, sealant primer, joint sealant, debonding strip, dowel bar, tie rod, admixtures as approved, curing compound, finishing to lines and grades as per drawing)	cum	7500.00
6.3	Rolled Cement Concrete Base (Construction of rolled cement concrete base course with coarse and fine aggregate conforming to IS:383, the size of coarse aggregate not exceeding 25 mm with minimum, aggregate cement ratio 15:1 and minimum cement content of 200 kg/cum, aggregate gradation to be as per table 600-4 after blending, mixing in batching plant at optimum moisture content, transporting to site, laying with a paver with electronic sensor, compacting with 8-10 tonnes smooth wheeled vibratory roller to achieve, the designed flexural strength, finishing and curing.)	cum	4234.00
6.4	Provision for "Cold-Weather Concreting" (Concrete to be placed safely without damage from freezing throughout the winter months in cold climates when for more than 3 successive days the average daily temperature drops below 5°C and stays below 10°C for more than one half of any 24 hour period)		
(i)	Add extra for cost of additional Portland cement @ 60 to 120 kg per 'Cum' of cement Concrete as per the direction of the Engineer in charge and as per the discretion of the designer's decision for required 'Heat Hydration' using mix design with particular water cement ratio, dimension of the concrete placement, ambient air temperature, initial concrete temperature, admixtures and the composition.		
	Mass Concreting by design mix (maximum cement content to be 400kg per Cum of concrete)	Cum	20%

	(or)		
(ii)	Add extra for cost of Chloride free Hardening accelerator at the rate of 0.20% to 5% by weight of cement, low water-cement ratio, low-slump concrete as per site climate and as per the direction of the Engineer in charge (the dosage of Chloride free accelerator should be as specified by the manufacturer and as per the discretion of the designer's decision)		
	PCC/RCC Concreting by design mix	Cum	7%
	(or)		
(iii)	Add extra for cost of heating the water or aggregates or sand or combination of all except cement to attain the temperature of concrete to be poured between 7°C to 21°C as per the direction of the Engineer in charge (the temperature of concrete poured should be controlled to eliminate possibility of thermal shrinkage or plastic shrinkage and cracking by design mix according to size of concrete members, climate conditions)		
	PCC/RCC Concreting by design mix	Cum	15%
	(or)		
(iv)	Add extra for cost of concreting on grounds or floors by thawing the surface before placing the concrete with suitable temperature and maintaining the temperature upto the extent of curing period by covering with insulated blankets and thawing if necessary as per the discretion of the designer and as per the direction of the Engineer in charge.		
	PCC/RCC Concreting by design mix	Cum	12%
	(or)		
(v)	Add extra for cost of concreting on closed conditions by providing and fixing insulated tarpaulin all around with vented heater arrangement to maintain the required temperature to avoid freezing while mixing/pouring, till initial setting time and upto curing period whichever is desirable as per the discretion of the designer and as per the direction of the Engineer in charge (a small portion of Building or Bridge sites as selected to minimise the installation of insulated covering and vented heater arrangement repetitively at every stage of work).		
	For Insulated covering and vented heating arrangement upto time period required as directed by Engineer in charge (this item can be combined with any of the concreting methods specified in item 6.4(i) or (ii) or (iii) or (iv) and combination of any as per the designer's discretion (record to be maintained for temperature of concrete poured to till curing period climate condition. The test results for the concrete at required intervals are to be made available and maintained as per designed requirements).	per 'Cum' of Concreting	25%

Chapter-8

TRAFFIC SIGNS, MARKINGS AND OTHER APPURTENANCES

Preamble:

- 1 Rate analysis for fencing has been done for two different heights, i.e., 1.20 m and 1.80 m. Any of these two can be adopted depending upon a particular situation and design.
- 2 Rate analysis for fencing provides for three types as under :
 - a) Barbed wire fencing
 - b) Welded steel wire fencing with mesh size of 75X25 mm
 - c) Welded steel wire fabric with mesh size of 75X50 mm
- 3 Kerbstone laying and road marking has been provided for laying by mechanical means.
- 4 Back filling of foundation of boundary pillars has been proposed with stone spalls, tightly packed and compacted.
- 5 The item pertaining to road traffic signals has not been analysed as this is a specialised work and rates can be obtained from firms having specialisation for design and installation of this work.
- 6 For metal beam crash barrier, a 'W' shaped beam of size 311 x 83 mm flange width made with structural steel corrugated plate 3 mm thick and having a length of 4.5 m has been provided, over a channel post of 150 x 75 x 5 mm with a spacer of channel section 150 x 75 x 5 mm, 330 mm long.
- 7 Printing of letters and signs is required to be measured and paid separately. A separate rate for lettering has been prepared and included in this chapter for this purpose.
- 8 Two support have been provided for direction and place identification signs where size is more than 0.9 sqm. Only one support is provided for size upto 0.9 sqm.
- 9 The traffic signs proposed are of retro-reflectorised type made of encapsulated lens type reflective sheeting fixed over aluminium sheeting as per Clause 801.3 and installation.
- 10 The size, location of traffic signs shall be as per IRC:67.
- 11 The rates for rigid, semi-rigid and flexible crash barriers have been included.
- 12 Provision has been made for a crane for installation of overhead signs.
- 13 Separate rates have been derived for Tubular steel railing with RCC posts and MS steel posts.
- 14 The organisation and financial aspects are required to be finalised in consultation with administrative and traffic authorities.
- 15 The rate for message display board for gantry mounted variable message sign is required to be ascertained from the market, this being a commercially produced item by specialised firms.
- 16 The rate analysis for traffic impact attenuators at abutments and piers have been included.
- 17 In the case of road signs and direction boards the depth of foundation and quantity of cement concrete provided in the rate analysis are indicative. These may be suitably increased in areas of higher wind velocities like coastal areas.
- 18 **Ducts for Utility Services Along and Across the Expressway/Highways :**

The running metre cost of duct along the road including inspection chambers (where applicable) or across the road will depend upon the approved design. The various item involved are earthen work, plain cement concrete, brick stone masonry, reinforcement cement concrete, form work, steel reinforcement, laying of pipe line (where duct is of pipe) and cast iron/RCC cover for the inspection chamber. The rate for these items are available under respective clauses which can be applied and running metre cost of duct worked out as per the approved design and drawing for particular situations. In case cast iron cover for the inspection chamber, the rate can be ascertained from the market for the size provided in the design and approved drawings.

19 Noise Barriers :

Noise barrier can be provided in the form of a brick wall of a suitable height as per the site requirement and approved design. The items involved for the construction of this barrier like earthwork, brick masonry, plain cement concrete, etc. are available in the Data Book, which can be applied to arrive at the cost of noise barrier based on the design adopted.

Alternatively, wherever space permits, cluster of trees, shrubs and plants can be grown by the road side 6 m away from the edge of the roadway. This will intercept the annoying sound waves and fumes from road vehicles.

Summary of Rate Analysis

CHAPTER-8

TRAFFIC SIGNS, MARKINGS & OTHER ROAD APPURTENANCES

Item No.	Descriptions	Unit	Rate
8.1	Cast in Situ Cement Concrete M20 kerb (Construction of cement concrete kerb with top and bottom width 115 and 165 mm respectively, 250 mm high in M 20 grade PCC on M-10 grade foundation 150 mm thick, foundation having 50 mm projection beyond kerb stone, kerb stone laid with kerb laying machine, foundation concrete laid manually, all complete as per clause 408)		
A	Using Concrete Mixer	metre	340.00
B	Using Concrete Batching and Mixing Plant	metre	344.00
8.2	Cast in Situ Cement Concrete M 20 Kerb with Channel (Construction of cement concrete kerb with channel with top and bottom width 115 and 165 mm respectively, 250 mm high in M 20 grade PCC on M10 grade foundation 150 mm thick, kerb channel 300 mm wide, 50 mm thick in PCC M20 grade, sloped towards the kerb, kerb stone with channel laid with kerb laying machine, foundation concrete laid manually, all complete as per clause 408)		
A	Using Concrete Mixer	metre	636.00
B	Using Concrete Batching and Mixing Plant	metre	648.00
8.3	Printing new letter and figures of any shade (Printing new letter and figures of any shade with synthetic enamel paint black or any other approved colour to give an even shade)		
(i)	Hindi (Matras commas and the like not to be measured and paid for Half letter shall be counted as half)	cm height per letter	1.00
(ii)	English and Roman	cm height per letter	0.60
8.5	Direction and Place Identification signs upto 0.9 sqm size board. (Providing and erecting direction and place identification retro-reflectorised sign as per IRC:67 made of encapsulated lens type reflective sheeting vide clause 801.3, fixed over aluminium sheeting, 2 mm thick with area not exceeding 0.9 sqm supported on a mild steel single angle iron post 75 x 75 x 6 mm firmly fixed to the ground by means of properly designed foundation with M15 grade cement concrete 45 x 45 x 60 cm, 60 cm below ground level as per approved drawing)	sqm	2642.00

8.6	Direction and Place Identification signs with size more than 0.9 sqm size board. (Providing and erecting direction and place identification retro-reflectorised sign as per IRC :67 made of encapsulated lens type reflective sheeting vide clause 801.3, fixed over aluminium sheeting, 2 mm thick with area exceeding 0.9 sqm supported on a mild steel angle iron post 75 mm x 75 mm x 6 mm, 2 Nos. firmly fixed to the ground by means of properly designed foundation with M 15 grade cement concrete 45 cm x 45 cm x 60 cm, 60 cm below ground level as per approved drawing)	sqm	5166.00
8.8	Painting Two Coats on New Concrete Surfaces (Painting two coats after filling the surface with synthetic enamel paint in all shades on new plastered concrete surfaces)	sqm	81.00
8.9	Painting on Steel Surfaces (Providing and applying two coats of ready mix paint of approved brand on steel surface after through cleaning of surface to give an even shade)	sqm	78.00
8.10	Painting on Wood Surfaces (Providing and applying two coats of ready mix paint of approved brand on wood surface after through cleaning of surface to give an even shade)	sqm	89.00
8.11	Painting Lines, Dashes, Arrows etc on Roads in Two Coats on New Work (Painting lines, dashes, arrows etc on roads in two coats on new work with ready mixed road marking paint conforming to IS:164 on bituminous surface, including cleaning the surface of all dirt, dust and other foreign matter, demarcation at site and traffic control)		
	(i) Over 10 cm in width	sqm	120.00
	(ii) Up to 10 cm in width	sqm	103.00
8.12	Painting Lines, Dashes, Arrows etc on Roads in Two Coats on Old Work (Painting lines, dashes, arrows etc on roads in two coats on old work with ready mixed road marking paint confirming to IS: 164 on bituminous surface, including cleaning the surface of all dirt, dust and other foreign matter, demarcation at site and traffic control)		
	(i) Over 10 cm in width	sqm	81.00
	(ii) Up to 10 cm in width	sqm	86.00
8.13	Road Marking with Hot Applied Thermoplastic Compound with Reflectorising Glass Beads on Bituminous Surface (Providing and laying of hot applied thermoplastic compound 2.5 mm thick including reflectorising glass beads @ 250 gms per sqm area, thickness of 2.5 mm is exclusive of surface applied glass beads as per IRC:35 .The finished surface to be level, uniform and free from streaks and holes.)	sqm	607.00
8.14	Kilo Metre Stone (Reinforced cement concrete M15 grade kilometre stone of standard design as per IRC:8-1980, fixing in position including painting and printing etc)		
	(i) 5th kilometre stone (precast)	each	3974.00
	(ii) Ordinary Kilometer stone (Precast)	each	2415.00
	(iii) Hectometer stone (Precast)	each	668.00

8.16	Boundary pillar (Reinforced cement concrete M15 grade boundary pillars of standard design as per IRC:25-1967, fixed in position including finishing and lettering but excluding painting)	each	552.00
8.17	G.I Barbed wire Fencing 1.2 metre high (Providing and fixing 1.2 metres high GI barbed wire fencing with 1.8 m angle iron posts 40 mm x 40 mm x 6 mm placed every 3 metres center to center founded in M15 grade cement concrete, 0.6 metre below ground level, every 15th post, last but one end post and corner post shall be strutted on both sides and end post on one side only and provided with 9 horizontal lines and 2 diagonals interwoven with horizontal wires, fixed with GI staples, turn buckles etc complete as per clause 807)	metre	336.00
8.18	G.I Barbed wire Fencing 1.8 metre high (Providing and fixing 1.8 metres high GI barbed wire fencing with 2.4 m angle iron posts 50 mm x 50 mm x 6 mm placed every 3 metres center to center founded in M15 grade cement concrete, 0.6 metre below ground level, every 15th post, last but one end post and corner post shall be strutted on both sides and end post on one side only and provided with 12 horizontal lines and 2 diagonals interwoven with horizontal wires, fixed with GI staples, turn buckles etc complete as per clause 807)	metre	549.00
8.19	Fencing with welded steel wire Fabric 75 mm x 50 mm (Suggestive) (Providing 1.20 metre high fencing with angle iron posts 50 mm x 50 mm x 6 mm at 3 metre center to center with 0.40 metre embedded in M15 grade cement concrete, corner, end and every 10th post to be strutted, provided with welded steel wire fabric of 75 mm x 50 mm mesh or 75 mm x 25 mm mesh and fixed to iron posts by flat iron 50 x 5 mm and bolts etc. complete in all respects.)	metre	729.00
8.20	Tubular Steel Railing on Medium Weight steel channel (ISMC series) 100 mm x 50 mm (Providing, fixing and erecting 50 mm dia steel pipe railing in 3 rows duly painted on medium weight steel channels (ISMC series) 100 mm x 50 mm, 1.2 metres high above ground, 2 m centre to centre, complete as per approved drawings)	metre	2697.00
8.21	Tubular Steel Railing on Precast RCC posts, 1.2 m high above ground level (Providing, fencing and erecting 50 mm dia painted steel pipe railing in 3 rows on precast M20 grade RCC vertical posts 1.8 metres high (1.2 m above GL) with 3 holes 50 mm dia for pipe, fixed 2 metres centre to, complete as per approved drawing)	metre	2146.00
8.22	Reinforced Cement Concrete Crash Barrier (Provision of an Reinforced cement concrete crash barrier at the edges of the road, approaches to bridge structures and medians, constructed with M-20 grade concrete with HYSD reinforcement conforming to IRC:21 and dowel bars 25 mm dia, 450 mm long at expansion joints filled with pre-moulded asphalt filler board, keyed to the structure on which it is built and installed as per design given in the enclosure to MOST circular No. RW/NH - 33022/1/94-DO III dated 24 June 1994 as per dimensions in the approved drawing and at locations directed by the Engineer, all as specified)		
(i)	M 20 grade concrete	metre	4239.00
8.23	Metal Beam Crash Barrier		

A	Type - A, "W" : Metal Beam Crash Barrier (Providing and erecting a "W" metal beam crash barrier comprising of 3 mm thick corrugated sheet metal beam rail, 70 cm above road/ground level, fixed on ISMC series channel vertical post, 150 x 75 x 5 mm spaced 2 m centre to centre, 1.8 m high, 1.1 m below ground/road level, all steel parts and fitments to be galvanised by hot dip process, all fittings to conform to IS:1367 and IS:1364, metal beam rail to be fixed on the vertical post with a spacer of channel section 150 x 75 x 5 mm, 330 mm long complete as per clause 810)	metre	3617.00
B	Type - B, "THRIE" : Metal Beam Crash Barrier (Providing and erecting a "Thrie" metal beam crash barrier comprising of 3 mm thick corrugated sheet metal beam rail, 85 cm above road/ground level, fixed on ISMC series channel vertical post, 150 x 75 x 5 mm spaced 2 m centre to centre, 2 m high with 1.15 m below ground level, all steel parts and fitments to be galvanised by hot dip process, all fittings to conform to IS:1367 and IS:1364, metal beam rail to be fixed on the vertical post with a space of channel section 150 x 75 x 5 mm, 546 mm long complete as per clause 810)	metre	4634.00
8.24	Road Traffic Signals electrically operated (Since it is a ready made item commercially produced and erected by specialised firm in the electrical and electronic field, rate may be taken based on market enquiry from firms specialised in this field and ISI certified for the approved design and drawing.)		
8.25	Flexible Crash Barrier, Wire Rope Safety Barrier (Providing and erecting a wire rope safety barrier with vertical posts of medium weight RS Joist (ISMB series) 100 mm x 75 mm (11.50 kg/m), 1.50 m long 0.85 m above ground and 0.65 m below ground level, split at the bottom for better grip, embedded in M 15 grade cement concrete 450 x 450 x 450 mm, 1.50 m center to center and with 4 horizontal steel wire rope 40 mm dia and anchored at terminal posts 15 m apart. Terminal post to be embedded in M 15 grade cement concrete foundation 2400 x 450 x 900 mm (depth), strengthened by a strut of RS joist 100 x 75 mm, 2 m long at 450 inclination and a tie 100 x 8 mm, 1.50 m long at the bottom, all embedded in foundation concrete as per approved design and drawing, rate excluding excavation and cement concrete.)	metre	3440.00
8.27	Street Lighting (Providing and erecting street light mounted on a steel circular hollow pole of standard specifications for street lighting, 9 m high spaced 40 m apart, 1.8 m overhang on both sides if fixed in the median and on one side if fixed on the footpath, fitted with sodium vapour lamp and fixed firmly in concrete foundation.)		
(i)	For Fixing in Median	each	14550.00
(ii)	For fixing in Footpath	each	14466.00
8.28	Lighting on Bridges (Providing and fixing lighting on bridges, mounted on steel hollow circular poles of standard specifications, 5 m high fixed on parapets with cement concrete, 20 m apart and fitted with sodium vapour lamp)	each	9372.00

8.29	Cable Duct Across the Road (Providing and laying of a reinforced cement concrete pipe duct, 300 mm dia, across the road (new construction), extending from drain to drain in cuts and toe of slope to toe of slope in fills, constructing head walls at both ends, providing a minimum fill of granular material over top and sides of RCC pipe as per IRC:98-1997, bedded on a 0.3 m thick layer of granular material free of rock pieces, outer to outer distance of pipe at least half dia of pipe subject to minimum 450 mm in case of double and triple row ducts, joints to be made leak proof, invert level of duct to be above higher than ground level to prevent entry of water and dirt, all as per IRC: 98 - 1997 and approved drawings.)		
(i)	Single Row for one utility service	metre	1202.00
(ii)	Double Row for two utility services	metre	2163.00
(iii)	Triple Row for three utility services	metre	3144.00
8.35	Road Markers/Road Stud with Lense Reflector (Providing and fixing of road stud 100x 100 mm, die cast in aluminium, resistant to corrosive effect of salt and grit, fitted with lense reflectors, installed in concrete or asphaltic surface by drilling hole 30 mm upto a depth of 60 mm and bedded in a suitable bituminous grout or epoxy mortar, all as per BS 873 part 4:1973)	each	651.00
8.36	Traffic Cone (Provision of red fluorescent with white reflective sleeve traffic cone made of low density polyethylene (LDPE) material with a square base of 390 x 390 x 35 mm and a height of 770 mm, 4 kg in weight, placed at 1.5 m interval, all as per BS 873)	each	1600.00
8.38	Rumble Strips (Provision of 15 nos rumble strips covered with premix bituminous carpet, 15-20 mm high at center, 250 mm wide placed at 1 m center to center at approved locations to control speed, marked with white strips of road marking paint.)	sqm	
8.40	High Mast Pole Lighting at Interchanges and Flyovers (Providing and erecting a high mast pole lighting with 30 m high hot dip galvanised mast designed to withstand forces exerted with wind speeds of 180 km per hour with 3 seconds gust, as per IS:875 (Part 3) - 1978, fitted with a base flange, door at the base of mast with heavy duty internal lock, lantern carriage, suitable winching arrangement for safe working load of 750 kg and high powered electrically driven power tools for raising and lowering of lantern carriage, flexible 8 core electric cable, lightening conductor, earthing terminal, and fixing 2 nos aviation obstruction lights on top of the mast, all complete as per approved design and drawings This is a specialised work and is generally done by firms who specialise in such jobs. The detailed designs and estimates are submitted by the firms alongwith their tender for checks by the Department. The cost of this work is required to be worked out based on approved design, drawings and estimate of the lowest tender. A separate contract for this work is concluded as the contractors for road and bridge works generally donot undertake such jobs.)		

8.43	Portable Barricade in Construction Zone (Installation of a steel portable barricade with horizontal rail 300 mm wide, 2.5 m in length fitted on a 'A' frame made with 45 x 45 x 5 mm angle iron section, 1.5 m in height, horizontal rail painted (2 coats) with yellow and white stripes, 150 mm in width at an angle of 450, 'A' frame painted with 2 coats of yellow paint, complete as per IRC:SP:55-2001)	each	3446.00
8.44	Permanent Type Barricade in Construction Zone		
A	With Steel Components (Construction of a permanent type barricade made of steel components, 1.5 m high from road level, fitted with 3 horizontal rails 200 mm wide and 4 m long on 50 x 50 x 5 mm angle iron vertical support, painted with yellow and white strips, 150 mm in width at an angle of 450, complete as per IRC:SP:55-2001)	each	5485.00
B	With Wooden Components (Construction of a permanent type barricade made of wooden components, 1.5 m high from road level, fitted with 3 horizontal planks 200 mm wide and 3.66 m long on 100 x 100mm wooden vertical post, painted with yellow and white strips, 150 mm in width at an angle of 450, complete as per IRC:SP:55-2001)	each	6079.00
C	With Bricks (Construction of a permanent type barricade made with brick work in mud mortar, 1.5 m high, 4 m long, 600 mm thick, plastered with cement mortar 1:6, painted with yellow and white strips)	each	22762.00
8.45	Drum Delineator in Construction Zone (Provision of metal drum/empty bitumen drum delineator, 300 mm in diameter, 800 mm high, filled with earth for stability, painted in circumferential strips of alternate black and white 100 mm wide fitted with reflectors 3 Nos of 7.5 cm dia, all as per IRC:SP:55-2001)	each	452.00
8.46	Flagman (Positioning of a smart flagman with a yellow vest and a yellow cap and a red flag 600 x 600 mm securely fastened to a staff 1 m in length for guiding the traffic)	each	462.00

Chapter – 9**PIPE CULVERTS****Preamble:**

- 1 Pipe culverts of sizes 1000 mm and 1200 mm dia in single row and double row which are generally used on roads, have been included. Providing and laying of pipe has been included in the rate analysis. Items of auxiliary works such as excavation, bedding, backfilling, concrete and masonry shall be analysed, as provided under the respective sections and paid for separately.
- 2 Analysis has been given separately for NP2 pipes for ease of adoption.
- 3 Cost of any river training and protection work like stone pitching, apron, curtain wall etc. may be analysed under the respective item included in Chapter 16.
- 4 The joining of pipes is proposed by collar joints.
- 5 Chain & pulley for lifting the pipes is considered part of overheads.
- 6 The thickness of first class bedding has been taken as 150 mm. The height of bedding has been taken as 1/10th of overall height of pipe in the analysis. This may be modified as per thickness indicated in the approved drawing.

Summary of Rate Analysis

CHAPTER-9

PIPE CULVERTS

Item No.	Descriptions	Unit	Rate
9.1	PCC 1:3:6 in Foundation (Plain cement concrete 1:3:6 mix with crushed stone aggregate 40 mm nominal size mechanically mixed, placed in foundation and compacted by vibration including curing for 14 days.)	cum	4723.00
9.2	Laying Reinforced Cement Concrete Pipe NP2/prestrssed concrete pipe on first class bedding in single row . (Laying Reinforced cement concrete pipe NP2/prestrssed concrete pipe for culverts on first class bedding of granular material in single row including fixing collar with cement mortar 1:2 but excluding excavation, protection works, backfilling, concrete and masonry works in head walls and parapets .)		
A	1000 mm dia	metre	2258.00
B	1200 mm dia	metre	2770.00
9.3	Laying Reinforced Cement Concrete Pipe NP 2 /prestrssed concrete pipe on first class bedding in double row . (Laying Reinforced cement concrete pipe NP2 /prestrssed concrete pipe for culverts on first class bedding of granular material in double row including fixing collar with cement mortar 1:2 but excluding excavation, protection works, backfilling, concrete and masonry works in head walls and parapets .)		
A	1000 mm dia	metre	4648.00
B	1200 mm dia	metre	5681.00

Chapter – 10**MAINTENANCE OF ROADS****Preamble:**

- 1 In the case of rain cuts, it has been assumed that some material cut by rain, approximately 25 per cent will be available at site which can be retrieved and re-used and the balance 75 per cent is required to be provided as fresh material.
- 2 For making up earthen shoulders, it has been assumed that on an average 150 mm filling will be required. Similarly, for stripping of excess soil from shoulder, an average depth of 75 mm has been assumed.
- 3 In the case of chocking of drain, it has been assumed that half the depth of drain has been filled with earth/debris, which requires clearance.
- 4 During the process of landslide clearance on hill roads, it has been assumed that earth will be disposed off by dozer on the valley side. In case there is any objection to this arrangement due to particular site conditions, resources like loader and tipper will have to be provided for disposal of earth/debris for the lead involved.
- 5 The item like slurry seal, fog spray, crack prevention courses, surface dressing for maintenance works have already been included in chapter 5 and are not being repeated in this chapter.
- 6 The cost of other items like repair of ruts and undulation maintenance of earthen shoulders, cross drainage works, minor and major bridges and miscellaneous items like turfing and arboriculture, painting and lettering on km stones, repair to signage, repair to footpath, street lighting, railing dividers, separators and under passes for pedestains has been given in the "Report of the Committee on Norms for Maintenance of Roads In India" Published by IRC in January 2001 which may be referred for guidance.
- 7 The repair items related to bridges have been given in chapter 16

Summary of Rate Analysis

CHAPTER-10

MAINTENANCE OF ROADS

Item No.	Descriptions	Unit	Rate
10.1	Restoration of Rain Cuts (Restoration of rain cuts with soil, moorum, gravel or a mixture of these, clearing the loose soil, benching for 300 mm width, laying fresh material in layers not exceeding 250 mm and compacting with plate compactor or power rammers to restore the original alignment, levels and slopes)	cum	139.00
10.2	Maintenance of Earthen Shoulder (filling with fresh soil) (Making up loss of material/ irregularities on shoulder to the design level by adding fresh approved soil and compacting it with appropriate equipment.)	sqm	70.00
10.3	Maintenance of Earth Shoulder (stripping excess soil) (Stripping excess soil from the shoulder surface to achieve the approved level and compacting with plate compactor)	sqm	23.00
10.4	Filling Pot- holes and Patch Repairs with open - graded Premix surfacing, 20mm. (Removal of all failed material, trimming of completed excavation to provide firm vertical faces, cleaning of surface, painting of tack coat on the sides and base of excavation as per clause 503, back filling the pot holes with hot bituminous material as per clause 511, compacting, trimming and finishing the surface to form a smooth continuous surface, all as per clause 3004.2)	sqm	185.00
10.5	Filling Pot- holes and Patch Repairs with - Bituminous concrete, 40mm. (Removal of all failed material, trimming of completed excavation to provide firm vertical faces, cleaning of surface, painting of tack coat on the sides and base of excavation as per clause 503, back filling the pot holes with hot bituminous material as per clause 504, compacting, trimming and finishing the surface to form a smooth continuous surface, all as per clause 3004.2)		
(i)	for grading I Material	sqm	418.00
(ii)	for grading II Material	sqm	443.00
10.6	Crack Filling (Filling of crack using slow - curing bitumen emulsion and applying crusher dust in case crack are wider than 3mm.)	metre	4.00
10.7	Dusting (Applying crusher dust to areas of road where bleeding of excess bitumen has occurred.)	sqm	1.40
10.8 A	Fog Seal (ref item 5.17)	sqm	0.00
B	Crack Prevention courses. (ref item 5.21)		
(i)	Stress Absorbing Membrane (SAM) crack width less than 6 mm	sqm	
(ii)	Stress Absorbing Membrane (SAM) with crack width 6 mm to 9 mm	sqm	
(iii)	Stress Absorbing Membrane (SAM) crack width above 9 mm and cracked area above 50 %	sqm	
(iv)	Bitumen Impregnated Geotextile	sqm	
C	Slurry Seal (ref item 5.15)		

(i)	5 mm thickness	sqm	
(ii)	3 mm thickness	sqm	
(iii)	1.5 mm thickness	sqm	
D	Surface Dressing for maintance works. (ref item 5.9)		
(i)	19 mm nominal chipping size	sqm	
(ii)	13 mm nominal size chipping	sqm	
	The above mentioned items have already been included in Chapter 5.		
10.9	Repair of joint Grooves with Epoxy Mortar Repair of spalled joint grooves of contraction joints, longitudinal joints and expansion joints in concrete pavements using epoxy mortar or epoxy concrete)	metre	380.00
10.10	Repair of old Joints Sealant (Removal of existing sealant and re sealing of contraction, longitudinal or expansion joints in concrete pavement with fresh sealant material)	metre	61.00
10.11	Hill Side Drain Clearance (Removal of earth from the choked hill side drain and disposing it on the valley side manually)	metre	33.00
10.12	Land Slide Clearance in soil		
(i)	Clearance of land slides in soil and ordinary rock by a bull-dozer D 80 A-12, 180 HP and disposal of the same on the valley side	cum	80.00
(ii)	Clearance of land slides in soil and ordinary rock by a bull-dozer D 50 A-15 and disposal of the same on the valley side	cum	56.00
10.13	Land slide Clearance in Hard Rock Requiring Blasting (Clearing of land slide in hard rock requiring blasting for 50% of the boulders and disposal of the same on the valley side with Bulldozer D 50)	cum	116.00
10.14	Snow Clearance on Roads with Dozer (Snow clearance from road surface by a bull- dozer 165 Hp and disposing it on the valley side)	cum	4.00
10.15	Maintenance of WBM Road (Maintenance of WBM road including filling up of pot holes, ruts and rectifying corrugated surface, damaged edges and ravelling as per technical specification clause 1906).	sqm	110.00
10.16	Maintenance of Hume Pipe (Maintenance of Hume Pipe Culvert by way of Cleaning, Clearing, Erosion repair, repairs to cracks, parapet wall and protection work as per drawing and technical specification Clasue 1908)	each	1089.00
10.17	Maintenance of Culverts Slab type (Maintenance of Slab type Culvert by way of Cleaning, Clearing, Erosion repair, repairs to cracks, parapet wall and protection work as per drawing and technical specification Clasue 1908).	each	2251.00
10.18	Maintenance of Causeway (Maintenance of Causeway by way of minor Surface repairs, replacing Guide Posts, repair of flood gauges, removal of debris, providing boulders and protection work and painting as per technical specifications Clause 1909).	metre	63.00
10.19	Maintenance of Road signs (Maintenance of Road signs by way of cleaning and repainting of mandatory/regulatory/cautionary/informatory and place identifications sign board as per drawings and technical specifications Clause 1910).	km	1061.00
10.20	Cutting of branches of trees shrubs and trimming of grass and weeds		

(i)	Cutting of branches of tress and shrubs from the road way or with in R.O.W. including disposal of wood and leaves to suitable location as per technical specification Clause 1914.	per tree	113.00
(ii)	Cutting of shrubs from the road way or with in R.O.W. and disposal of shrubs to suitable location as per technical specification Clause 1914.	per shrub	6.00
(iii)	Triming of grass and weeds from the shoulders/berms and disposing off the same to suitable locations as per technical specifications Clause 1914.	sqm	2.00
10.21	White washing of parapet walls of CD work and tree trunks (White washing two coats on parapet walls and tree trunks including preparation of surface by cleaning scraping etc. as per technical specifications Clause 1915)	sqm	19.00

Chapter – 11 HORTICULTURE

Preamble:

1. The items of turfing with sods and seeding and mulching have been included in the chapter of earthwork.
2. The rates for grassing of lawns and hedges has been included, as the same may be needed for resting places on highways.
3. Five types of tree guards as under have been provided -
 - a) Half brick circular type
 - b) Tree guards made from empty bitumen drums 1.30 m high.
 - c) Tree guards made from empty bitumen drums 2.00 m high.
 - d) Tree guards with MS flat iron.
 - e) Tree guards with MS angle and 3 mm steel wire welded on MS flat and bolted to angle iron posts.
4. Selection from above may be made as per actual situation and design.
5. Rates for wrought iron and mild welded work has been included to cater for any miscellaneous work in connection with horticulture, fencing and traffic sign.
6. Though the estimate for compensatory afforestation is made by the forest department, the rate for this item has been analysed and included for the purpose of estimation.
7. As grass and plantation need more care, one mate has been provided for every 10 mazdoors in case of horticulture.

Summary of Rate Analysis

CHAPTER-11 HORTICULTURE

Item No.	Descriptions	Unit	Rate
11.1	Spreading of Sludge Farm Yard Manure or/and good Earth (Spreading of sludge farm yard manure or/ and good earth in required thickness (cost of sludge, farm- yard manure or/and good earth to be paid for separately))	cum	21.00
11.2	Grassing with ' Doobs' Grass (Grassing with 'Doobs' grass including watering and maintenance of the lawn for 30 days or more till the grass forms a thick lawn free from weeds and fit for moving including supplying good earth if needed)		
(i)	In rows 15 cm apart in either direction	sqm	25.00
(ii)	In rows 7.5 cm apart in either direction	sqm	43.00
11.3	Making Lawns including Ploughing and Dragging with 'Swagha' Breaking of Clod (Making lawns including ploughing and breaking of clod, removal of rubbish, dressing and supplying doobs grass roots and planting at 15 cm apart, including supplying and spreading of farm yard manure at rate of 0.18 cum per 100 sqm)	sqm	25.00
11.4	Maintenance of Lawns or Turfing of Slopes (Maintenance of lawns or Turfing of slopes (rough grassing) for a period of one year including watering etc)	sqm	190.00
11.5	Turfing Lawns with Fine Grassing including Ploughing, Dressing (Turfing lawns with fine grassing including ploughing, dressing including breaking of clods, removal of rubbish, dressing and supplying doobs grass roots at 10 cm apart, including supplying and spreading of farm yard manure at rate of 0.6 cum per 100 sqm)	sqm	29.00
11.6	Maintenance of Lawns with Fine Grassing for the First Year	sqm	198.00
11.7	a) Planting Permanent Hedges including Digging of Trenches (Planting permanent hedges including digging of trenches, 60 cm wide and 45 cm deep, refilling the excavated earth mixed with farmyard manure, supplied at the rate of 4.65 cum per 100 metres and supplying and planting hedge plants at 30 cm apart)	metre	124.00
(b)	Maintenance of Hedge for one year	metre	164.00
11.8	a) Planting Flowering Plants and Shrubs in Central Verge	km	33520.00
(b)	Maintenance of Flowering Plants and Shrubs in Central Verge for one Year	km	193094.00
11.9	Planting of Trees and their Maintenance for one Year (Planting of trees by the road side (Avenue trees) in 0.60 m dia holes, 1 m deep dug in the ground, mixing the soil with decayed farm yard/sludge manure, planting the saplings, backfilling the trench, watering, fixing the tree guard and maintaining the plants for one year)	each	2573.00

11.10	Renovation Lawns including, Weeding, Forking the Ground, Top Dressing with Forked Soil (Renovation lawns including, weeding, forking the ground, top dressing with forked soil, watering and maintenance the lawns, for 30 days or more, till the grass forms a thick lawn, free from weeds, and fit for moving and disposal of rubbish as directed, including supplying good earth, if needed but excluding the cost of well decayed farm yard manure)	sqm	15.00
11.11	Supply at Site Well Decayed Farm Yard Manure (Supply at site of work well decayed farm yard manure, from any available source, approved by the engineer in charge including screening and stacking)	cum	146.00
11.14	Half Brick Circular Tree Guard, in 2nd class Brick, internal diameter 1.25 metres, and height 1.2 metres, above ground and 0.20 metre below ground (Half brick circular tree guard, in 2nd class brick, internal diameter 1.25 metres, and height 1.2 metres, above ground and 0.20 metre below ground, bottom two courses laid dry, and top three courses in cement mortar 1:6 (1 cement 6 sand) and the intermediate courses being in dry honey comb masonry, as per design complete)	each	2817.00
11.15	Edging with 2nd class Bricks, laid dry lengthwise (Edging with 2nd class bricks, laid dry lengthwise, including excavation, refilling, consolidation, with a hand packing and spreading nearly surplus earth within a lead of 50 metres)	metre	58.00
11.16	Making Tree Guard 53 cm dia and 1.3 m high as per design from empty bitumen drum (Making tree guard 53 cm dia and 1.3 m high as per design from empty bitumen drum, slit suitably to permit sun and air, (supplied by the department at stock issue rate) including providing and fixing 2 nos MS sheet rings 50 x 0.5 mm with rivets, complete in all respect)	each	243.00
11.17	Making Tree Guard 53 cm dia and 2 metres high as per design from empty bitumen drums (Making tree guard 53 cm dia and 2 metres high as per design from empty bitumen drums, slit suitably to permit sun and air, (supplied by the department at stock issue rate) including providing and fixing four legs 40 cm long of 30 x 3 mm MS riveted to tree guard and providing and fixing 2 nos MS sheet rings 50 x 0.5 mm with rivets complete in all respects)	each	470.00
11.18	Wrought Iron and Mild Steel Welded Work (Wrought iron and mild steel welded work) (using angles, square bars, tees and channel grills, grating frames, gates and tree guards of any size and design etc. including cost of screens and welding rods or bolts and nuts complete fixed in position but without the cost of excavation and concrete for fixing which will be paid separately)	quintal	9398.00
11.19	Tree Guard with MS Iron (Providing and fixing MS iron tree guard 60 cm dia and 2 metre high above ground level formed of 4 Nos (25 x 6 mm) and 8 Nos (25 x 3 mm) vertical MS riveted to 3 Nos (25 x 6 mm) iron rings in two halves, bolted together with 8 mm dia and 30 mm long bolts including painting two coats with paint of approved brand over a coat of priming, complete in all respects.)	each tree guard	2362.00
11.20	Tree Guard with MS Angle Iron and Steel Wire (Providing and fixing tree guard 0.60 metre square, 2.00 metre high fabricated with MS angle iron 30 x 30 x 3 mm, MS iron 25 x 3 mm and steel wire 3 mm dia welded and fabricated as per design in two halves bolted together)	each tree guard	3864.00

11.21	Compensatory Afforestation (Planting trees as compensatory afforestation at the rate of 290 trees per hectare at a spacing of 6 m by grubbing and leveling the ground upto a depth of 150 mm, digging holes 0.9 m dia, 1 m deep, mixing farm yard/sludge manure with soil, planting of sapling 2 m high with 25 cm dia stem, backfilling the hole and watering)	hectare	112519.00
-------	--	---------	------------------

Chapter – 12

FOUNDATION

Preamble:

- 1 Excavation for structures has been provided both by manual and mechanical means.
- 2 The earth excavated from foundation has been proposed to be backfilled and balance quantity utilised for road works locally except for marshy soil where disposal has been provided.
- 3 In case of rocks, excavation has been considered upto a depth of 3 m only.
- 4 Embedment of foundation in soft and hard rocks has been provided as required by the specifications.
- 5 Dewatering has been provided in excavation for foundation on percentage basis. In case less dewatering is required or is not required at all for a particular site condition, the same may be reduced/omitted.
- 6 Mixing of cement concrete has been considered by using concrete mixer and batching plant. The rate can be adopted depending upon availability of equipment and as approved by the Engineer.
- 7 Concrete batching plant is considered to be placed within 10 (ten) km of the bridge site.
- 8 The coarse and fine aggregate for cement concrete shall be as per IS:383.
- 9 Description of items has been given very briefly. Relevant Clause of MoRT&H Specifications have to be referred for detailed specification.
- 10 The rate for well foundation has been included for diameter varying from 6 m to 12 m. Well for twin D type has also been included.
- 11 Pneumatic sinking is a specialised job. All safety precautions as per IS:4138 are required to be taken. Medical supervision for such works is considered very essential. Depth of Pneumatic sinking has been restricted to 30 m below normal water level.
- 12 Rates for various type of piles like bored cast-in-situ, driven precast RCC pile and driven steel piles of H section have been included. If the steel casting in case of driven pile is required to be retained the same is required to be priced separately.
- 13 Pile driving rigs including vibratory hammers are considered to be self contained with power units and necessary accessories required for driving.
- 14 The quantity of concrete which is required to be stripped off upto a minimum height of 600 mm above the designed top level of the pile has been taken into account in the rate.
- 15 The levelling course below the pile cap is proposed with M 15 grade concrete.
- 16 Rates for Steel reinforcement for cement concrete works are provided separately.
- 17 Appendix-4 of IRC:78-2000 has to be referred regarding precautions to be taken during sinking of wells.

- 18 In case of blasting during sinking of wells the inner face of the curb is required to be protected with the steel plates of thickness not less than 10 mm upto top level of well curb. For height above top of curb, the thickness of steel plate may be reduced to 6 mm. This extra height of steel lining should be limited to 3 m.
- 19 The concrete mix used in bottom plug shall have a minimum cement content of 330 kg/cum and a slump of about 150 mm to permit easy flow of concrete through tremie to fill-up all cavities.
- 20 Necessary safety precautions shall be taken for excavation on open foundations for which guidance may be taken from IS:3764.
- 21 A levelling course of 100 mm thickness in M 10 (1:3:6) shall be provided before laying open foundations.
- 22 In the case of open foundation, dewatering shall not be permitted from the time of placing of concrete upto 24 hours after placement.
- 23 In case of open foundations in rock, the trenches around the footing shall be filled-up with concrete of M 15 grade upto a level of 0.6 m for hard rock and 1.5 m for soft rock above the foundation level. The portion above this shall be filled by boulders grouted with cement.
- 24 When there are two or more compartments in a well, the lower edge of the cutting edge of the middle stems of such wells shall be kept about 300 mm above that of outer stems to prevent rocking.
- 25 The well curb shall be in RCC of mix not leaner than M 25 grade with minimum steel reinforcement of 72 kg/cum excluding bond rods.
- 26 The top of bottom plug shall be atleast 300 mm above top of curb.
- 27 No dewatering shall be carried out within 7 days of casting of bottom plug.
- 28 In case of cement concrete piles, the minimum grade of concrete shall be M 35 with minimum cement content of 400 kg/cum.
- 29 The top of the pile shall project 50 mm into the pile cap and reinforcement of pile shall be fully anchored in pile cap.
- 30 The minimum thickness of pile cap should be atleast 0.6 m or 1.5 times the diameter of the pile whichever is more.
- 31 Guidance for piles is to be obtained from IS:2911.
- 32 Concrete in driven cast-in-situ piles shall be cast upto a minimum height of 600 mm above the designed top level of pile, which shall be stripped off to obtain sound concrete either before final set or after 3 days.
- 33 In remote areas, for isolated slab culvert/box culvert upto 2 m span, concrete can be hand mixed in accordance with Clause 806 of MORD Specifications. Therefore, in the analysis, for items of concrete, the alternative of hand mixing has also been considered.

Summary of Rate Analysis

CHAPTER-12 FOUNDATIONS

Item No.	Descriptions	Unit	Rate
12.1	Excavation for Structures (Earth work in excavation of foundation of structures as per drawing and technical specification, including setting out, construction of shoring and bracing, removal of stumps and other deleterious matter, dressing of sides and bottom and backfilling with approved material.)		
	I Ordinary soil		
	A Manual Means		
	(i) upto 3 m depth	cum	121.00
	(ii) 3 m to 6 m depth	cum	156.00
	(iii) Above 6 m depth	cum	208.00
	B Mechanical Means		
	(i) Depth upto 3 m	cum	63.00

	B Clayey soil (12 m dia. Well)		
	(i) Depth below bed level upto 3.0 M	metre	45702.00
	(ii) Beyond 3m upto 10m depth	metre	75389.00

(iii)	Beyond 10 m upto 20 m		
a	Add 5% for every additional meter depth of sinking over the rate of sinking for the previous meter	metre	99565.00
b	Add for dewatering @ 5% of cost, if required.	metre	104543.00
(iv)	Beyond 20m upto 30 m		
a	Add 7.5% for every additional meter depth of sinking over the rate of sinking for the previous meter	metre	186757.00
b	Add 5% of cost for dewatering on the cost, if required	metre	245119.00
c	Add 25% of cost for Kentledge including supports, loading arrangement and Labour).	metre	233447.00
(v)	Beyond 30m upto 40 m		
a	Add 10% for every additional meter depth of sinking over the rate of sinking for the previous meter	metre	443710.00
b	Add 5% of cost for dewatering, if required	metre	559075.00
c	Add 20% of cost for Kentledge including supports, loading arrangement and Labour).	metre	532452.00
C	Soft rock (12m dia well)		
(i)	Depth of soft rock strata upto 3m	metre	119174.00
D	Hard rock (12m dia well)		
(i)	Depth of hard rock strata upto 3 m	metre	146758.00
12.19	Sinking of Twin D Type well (other than pneumatic method of sinking) through all types of strata namely sandy soil, clayey soil and rock as shown against each case, complete as per drawing and technical specifications. Depth of sinking is reckoned from bed level.		
A	Sandy soil		
(i)	Depth from bed level upto 3.0 M	metre	9212.00
(ii)	Beyond 3m upto 10m depth	metre	9965.00
(iii)	Beyond 10m upto 20m		
a	Add 5% for every additional meter depth of sinking over the rate of sinking for the previous meter	metre	13161.00
(iv)	Beyond 20m upto 30 m		
a	Add 7.5% for every additional meter depth of sinking over the rate of sinking for the previous meter	metre	24687.00
b	Add 20% of cost for Kentledge including supports, loading arrangement and Labour .	metre	29624.00
(v)	Beyond 30m upto 40 m		
a	Add 10% for every additional meter depth of sinking over the rate of sinking for the previous meter	metre	58652.00
b	Add 20% of cost for Kentledge including supports, loading arrangement, and Labour etc.	metre	70383.00
B	Clayey soil (Twin D Type Well)		
(i)	Depth below bed level upto 3.0 M	metre	10948.00
(ii)	Beyond 3m upto 10m depth	metre	16462.00
(iii)	Beyond 10 m upto 20 m		
a	Add 5% for every additional meter depth of sinking over the rate of sinking for the previous meter	metre	21740.00
b	Add for dewatering @ 5% of cost, if required.	metre	22827.00
(iv)	Beyond 20m upto 30 m		

	a Add 7.5% for every additional meter depth of sinking over the rate of sinking for the previous meter	metre	40778.00
	b Add 5% of cost for dewatering on the cost, if required	metre	53521.00
	c Add 25% of cost for Kentledge including supports, loading arrangement and Labour).	metre	50973.00
	(v) Beyond 30m upto 40 m		
	a Add 10% for every additional meter depth of sinking over the rate of sinking for the previous meter	metre	96884.00
	b Add 5% of cost for dewatering, if required	metre	122073.00
	c Add 20% of cost for Kentledge including supports, loading arrangement and Labour).	metre	116260.00
	C Soft rock (Twin D Type well)		
	(i) Depth of soft rock strata upto 3m	metre	26360.00
	D Hard rock (Twin D Type well)		
	(i) Depth of hard rock strata upto 3 m	metre	30990.00
12.21	Sand filling in wells complete as per drawing and technical specifications	cum	958.00
12.22	Providing steel liner 10 mm thick for curbs and 6mm thick for steining of wells including fabricating and setting out as per detailed drawing	tonne	94837.00
12.23	Bored cast-in-situ M35 grade R.C.C. pile excluding reinforcement complete as per drawing and technical specifications and removal of excavated earth with all lifts and lead upto 1000 m. (Pile diameter-750 mm)	metre	6880.00
12.24	Bored cast-in-situ M35 grade R.C.C. pile excluding reinforcement complete as per drawing and technical specifications and removal of excavated earth with all lifts and lead upto 1000 m. (Pile diameter-1000 mm)	metre	11357.00
12.25	Bored cast-in-situ M35 grade R.C.C. pile excluding reinforcement complete as per drawing and technical specifications and removal of excavated earth with all lifts and lead upto 1000 m. (Pile diameter-1200 mm)	metre	14725.00
12.26	Driven cast-in-place vertical M35 grade R.C.C. pile excluding reinforcement complete as per drawing and & Technical Specification (Pile diameter - 750 mm)	metre	5813.00
12.27	Driven cast-in-place vertical M35 grade R.C.C. piles excluding reinforcement complete as per drawing and & Technical Specification (Pile diameter - 1000 mm)	metre	9326.00
12.28	Driven cast-in-place vertical M35 grade R.C.C. piles excluding reinforcement complete as per drawing and & Technical Specification (Pile diameter - 1200 mm)	metre	13613.00
12.37	Pile load test on single vertical pile in accordance with IS:2911(Part-IV)		
	(a) Initial and routine load test	tonne	1500.00
	(b) Routine test	tonne	1000.00
	(b) Lateral load test	tonne	5000.00
12.38	Cement concrete for reinforced concrete in pile cap complete as per drawing and Technical Specification		

A	RCC Grade M20		
(i)	Using Concrete Mixer	cum	7092.00
(ii)	Using Batching Plant, Transit Mixer and Concrete Pump	cum	6939.00
B	RCC Grade M25		
(i)	Using concrete mixer.	cum	7739.00
(ii)	Using Batching Plant, Transit Mixer and Concrete Pump	cum	7595.00
C	RCC Grade M30		
(i)	Using concrete mixer.	cum	7820.00
(ii)	Using Batching Plant, Transit Mixer and Concrete Pump	cum	7667.00
D	RCC Grade M35		
(i)	Using concrete mixer.	cum	7991.00
(ii)	Using Batching Plant, Transit Mixer and Concrete Pump	cum	7847.00
12.39	Levelling course for Pile cap	cum	5786.00
12.40	Supplying, fitting and placing un-coated HYSD bar reinforcement in foundation complete as per drawing and technical specifications	tonne	78187.00
12.41	Supplying, fitting and placing un-coated Mild steel reinforcement complete in foundation as per drawing and technical specification	tonne	78496.00
12.42	Providing and Installation of Steel driven Piles with Corrosion resistant/Treated Structural Steel including welding of joints, fabrication of Shoe,Cap etc, as per detailed drawing and specification complete and as per direction of the Engineer in-charge.	MT	118483.00

Chapter – 13**SUBSTRUCTURE****Preamble:**

- 1 Although, substructure are generally constructed in cement concrete, the rate for brick and stone masonry in CM 1:3 have also been included which can be adopted permitted by design.
- 2 The cost of formwork will vary with the height and cross-section of the substructure. Provision has been made accordingly.
- 3 Bridge bearing, being commercial item produced by specialised firms with imported technology and parts, the rates for the same are ascertained by quotation from the market for the approved design and technical specifications.
- 4 Filter media and backfilling behind abutment are required to be provided as per guidelines in IRC:78- 2000.
- 5 Weep holes shall be provided as per specifications.
- 6 In case of roller-cum-rocker bearings, only full circular rollers are to be provided.
- 7 Bearing shall be set truly level so as to have full and even seating.
- 8 For elastomeric bearings, the concrete surface shall be leveled such that the variation is not more than 1.5 mm from a straight edge placed in any direction across the area.
- 9 The bearing should be procured only from those manufacturers who have been prequalified by the Ministry of Road Transport and Highways.
- 10 The bottoms of girders resting on the bearing shall be plane and truly horizontal.
- 11 For spans in garde, the bearing shall be placed horizontal by using sole plates for suitbly designed RCC pedestals.

Summary of Rate Analysis

CHAPTER-13

SUB-STRUCTURE

Item No.	Descriptions	Unit	Rate
13.1	Brick masonry work in 1:3 in sub-structure complete excluding pointing and plastering, as per drawing and technical specifications	cum	8628.00
13.2	Pointing with cement mortar (1:3) on brick work in substructure as per Technical specifications	sqm	64.10
13.3	Plastering with cement mortar (1:3) on brick work in sub-structure as per Technical specifications	sqm	138.50
13.4	Stone masonry work in cement mortar 1:3 for substructure complete as per drawing and Technical Specifications		
A	Random Rubble Masonry	cum	4227.00
B	Coursed rubble masonry (first sort)	cum	4372.00
C	Ashlar masonry (first sort)	cum	5519.00
13.5	Plain/Reinforced cement concrete in sub-structure complete as per drawing and technical specifications		
A	PCC Grade M15		
(p)	Height upto 5m	cum	6550.00
B	PCC Grade M20		
(p)	Height upto 5m	cum	7301.00
C	PCC Grade M25		
(p)	Height upto 5m		
Case I	Using concrete Mixer	cum	7953.00
Case II	With Batching Plant, Transit Mixer and Concrete Pump	cum	7764.00
(q)	Height 5m to 10m		
Case I	Using concrete Mixer	cum	8242.00
Case II	With Batching Plant, Transit Mixer and Concrete Pump	cum	8046.00
(r)	Height above 10m		
Case I	Using concrete Mixer	cum	8603.00
Case II	With Batching Plant, Transit Mixer and Concrete Pump	cum	8399.00
D	PCC Grade M30		
(p)	Height upto 5m		
Case I	Using concrete Mixer	cum	8024.00
Case II	With Batching Plant, Transit Mixer and Concrete Pump	cum	7828.00
(q)	Height 5m to 10m		
Case I	Using concrete Mixer	cum	8316.00
Case II	With Batching Plant, Transit Mixer and Concrete Pump	cum	8112.00
(r)	Height above 10m		
Case I	Using concrete Mixer	cum	8680.00
Case II	With Batching Plant, Transit Mixer and Concrete Pump	cum	8468.00

E	RCC Grade M20		
(p)	Height upto 5m		
Case I	Using concrete Mixer	cum	7562.00
Case II	With Batching Plant, Transit Mixer and Concrete Pump	cum	7367.00
(q)	Height 5m to 10m		
Case I	Using concrete Mixer	cum	7837.00
Case II	With Batching Plant, Transit Mixer and Concrete Pump	cum	7635.00
(r)	Height above 10m		
Case I	Using concrete Mixer	cum	8181.00
Case II	With Batching Plant, Transit Mixer and Concrete Pump	cum	7970.00
F	RCC Grade M25		
(p)	Height upto 5m		
Case I	Using concrete Mixer	cum	8223.00
Case II	With Batching Plant, Transit Mixer and Concrete Pump	cum	8157.00
(q)	Height 5m to 10m		
Case I	Using concrete Mixer	cum	8492.00
Case II	With Batching Plant, Transit Mixer and Concrete Pump	cum	8424.00
(r)	Height above 10m		
Case I	Using concrete Mixer	cum	8895.00
Case II	With Batching Plant, Transit Mixer and Concrete Pump	cum	8825.00
G	RCC Grade M30		
(p)	Height upto 5m		
Case I	Using concrete Mixer	cum	8262.00
Case II	With Batching Plant, Transit Mixer and Concrete Pump	cum	8069.00
(q)	Height 5m to 10m		
Case I	Using concrete Mixer	cum	8495.00
Case II	With Batching Plant, Transit Mixer and Concrete Pump	cum	8296.00
(r)	Height above 10m		
Case I	Using concrete Mixer	cum	8825.00
Case II	With Batching Plant, Transit Mixer and Concrete Pump	cum	8619.00
H	RCC Grade M35		
(p)	Height upto 5m		
Case I	Using concrete Mixer	cum	8442.00
Case II	With Batching Plant, Transit Mixer and Concrete Pump	cum	8385.00
(q)	Height 5m to 10m		
Case I	Using concrete Mixer	cum	8626.00
Case II	With Batching Plant, Transit Mixer and Concrete Pump	cum	8568.00
(r)	Height above 10m		
Case I	Using concrete Mixer	cum	8902.00
Case II	With Batching Plant, Transit Mixer and Concrete Pump	cum	8843.00
13.6	Supplying, fitting and placing HYSD bar reinforcement in sub-structure complete as per drawing and technical specifications	tonne	78328.00

13.7	Supplying, fitting and placing Mild steel reinforcement complete in sub-structure as per drawing and technical specification	tonne	77710.00
13.8	Providing weep holes in Brick masonry/Plain/Reinforced concrete abutment, wing wall/return wall with 100 mm dia AC pipe, extending through the full width of the structure with slope of 1V :20H towards drawing face. Complete as per drawing and Technical specifications	each	140.00
13.9	Back filling behind abutment, wing wall and return wall complete as per drawing and Technical specification		
A	Granular material	cum	963.00
B	Sandy material	cum	1201.00
13.10	Providing and laying of Filter media with granular materials/stone crushed aggregates satisfying the requirements laid down in clause 2504.2.2. of MoRTH specifications to a thickness of not less than 600 mm with smaller size towards the soil and bigger size towards the wall and provided over the entire surface behind abutment, wing wall and return wall to the full height compacted to a firm condition complete as per drawing and technical specification.	cum	2122.00
13.11	Supplying, fitting and fixing in position true to line and level cast steel rocker bearing conforming to IRC: 83(Pt.-1) section IX and clause 2003 of MoRTH specifications complete including all accessories as per drawing and Technical Specifications.	tonne capacity	1616.00
13.12	Supplying, fitting and fixing in position true to line and level forged steel roller bearing conforming to IRC: 83(Pt.-1) section IX and clause 2003 of MoRTH specifications complete including all accessories as per drawing and Technical Specifications.	tonne capacity	1422.00
13.13	Supplying, fitting and fixing in position true to line and level sliding plate bearing with PTFE surface sliding on stainless steel complete including all accessories as per drawing and Technical Specifications and BS: 5400, section 9.1 & 9.2 (for PTFE) and clause 2004 of MoRTH Specifications.	tonne capacity	3032.00
13.14	Supplying, fitting and fixing in position true to line and level elastomeric bearing conforming to IRC: 83 (Part-II) section IX and clause 2005 of MoRTH specifications complete including all accessories as per drawing and Technical Specifications.	cubic centimetre	1.00
13.15	Supplying, fitting and fixing in position true to line and level sliding plate bearing with stainless steel plate sliding on stainless steel plate with mild steel matrix complete including all accessories as per drawing and Technical Specifications.	tonne capacity	248.00
13.16	Supplying, fitting and fixing in position true to line and level POT-PTFE bearing consisting of a metal piston supported by a disc or unreinforced elastomer confined within a metal cylinder, sealing rings, dust seals, PTFE surface sliding against stainless steel mating surface, complete assembly to be of cast steel/fabricated structural steel, metal and elastomer elements to be as per IRC: 83 part-I & II respectively and other parts conforming to BS: 5400, section 9.1 & 9.2 and clause 2006 of MoRTH Specifications complete as per drawing and approved technical specifications.	tonne capacity	326.00

Chapter – 14

SUPERSTRUCTURE

Preamble:

- 1 The rate for the wearing coat has been analysed as under in accordance with the provisions of MoRT&H Specifications:
 - a. Cement concrete wearing coat
 - b. Ashphaltic concrete wearing coat
 - c. Bitumen mastic wearing coat

The item may be selected as per approved design
- 2 The rates are provided for both RCC Railing and M. S. Railing, which can be adopted as per approved design.
- 3 The length of drainage spout has been provided in such a way that it is connected to the drainage system on the ground in case of flyovers and there is no splashing of water on the structure in case of bridges.
- 4 The rate for anti-corrosive treatment is ascertained from firms specialised in this work. In this connection Circular No. RW/NH-34041/44/91-S&R dated 21.03.2000 of Ministry of Road Transport and Highways may be referred for further details
- 5 Expansion joints involving movements exceeding 40 mm are specialised readymade items commercially produced by reputed firms with imported technology and parts. The rates for such joints are ascertained from the firms pre-qualified by the Ministry.
- 6 The Rates for pre-cast and pre-tensioned girders has also been included.
- 7 MoRT&H letter No. RW/NH-34059/1/96 S&R dated 30-11-2000 and subsequent corrigendum dated 25-01-2001 may be referred for detailed specifications and provisions for various types of expansion joints.
- 8 For bridges having wide deck/span length of more than 120 m or/and involving complex movements/rotations in different directions/planes, provision of special type of modular expansion joints such as swivel joists joint are required for which firms specialised in this field may be consulted. Such cases will require prior approval of Ministry.

Summary of Rate Analysis

CHAPTER-14

SUPER-STRUCTURE

Item No.	Descriptions	Unit	Rate
14.1	Furnishing and Placing Reinforced/Prestressed cement concrete in super-structure as per drawing and Technical Specification		
A	RCC Grade M20		
Case I	Using Concrete Mixer		
(i)	For solid slab super-structure, 20-30% of (a+b+c)		
(p)	Height upto 5m	cum	8172.00
(q)	Height 5m to 10m	cum	8512.00
(r)	Height above 10m	cum	8853.00
(ii)	For T-beam & slab, 25-35% of (a+b+c)		
(p)	Height upto 5m	cum	8512.00
(q)	Height 5m to 10m	cum	8853.00
(r)	Height above 10m	cum	9193.00
Case II	Using Batching Plant, Transit Mixer and Concrete Pump		
(i)	For solid slab super-structure, 20-30% of (a+b+c)		
(p)	Height upto 5m	cum	7958.00
(q)	Height 5m to 10m	cum	8289.00
(r)	Height above 10m	cum	8621.00
(ii)	For T-beam & slab, 25-35% of (a+b+c)		
(p)	Height upto 5m	cum	8289.00
(q)	Height 5m to 10m	cum	8621.00
(r)	Height above 10m	cum	8952.00
B	RCC Grade M25		
Case I	Using Concrete Mixer		
(i)	For solid slab super-structure, 20-30% of (a+b+c)		
(p)	Height upto 5m	cum	8917.00
(q)	Height 5m to 10m	cum	9289.00
(r)	Height above 10m	cum	9661.00
(ii)	For T-beam & slab, 25-35% of (a+b+c)		
(p)	Height upto 5m	cum	9289.00
(q)	Height 5m to 10m	cum	9661.00
(r)	Height above 10m	cum	10032.00
Case II	Using Batching Plant, Transit Mixer and Concrete Pump		
(i)	For solid slab super-structure, 20-30% of (a+b+c)		
(p)	Height upto 5m	cum	8713.00
(q)	Height 5m to 10m	cum	9076.00
(r)	Height above 10m	cum	9439.00
(ii)	For T-beam & slab, 25-35% of (a+b+c)		

(p)	Height upto 5m	cum	9076.00
(q)	Height 5m to 10m	cum	9439.00
(r)	Height above 10m	cum	9802.00
C	RCC Grade M 30		
Case I	Using Concrete Mixer		
(i)	For solid slab super-structure, 20-30% of (a+b+c)		
(p)	Height upto 5m	cum	9039.00
(q)	Height 5m to 10m	cum	9416.00
(r)	Height above 10m	cum	9793.00
(ii)	For T-beam & slab, 25-35% of (a+b+c)		
(p)	Height upto 5m	cum	9416.00
(q)	Height 5m to 10m	cum	9793.00
(r)	Height above 10m	cum	10169.00
Case II	Using Batching Plant, Transit Mixer and Concrete Pump.		
(i)	For solid slab super-structure, 20-30% of (a+b+c)		
(p)	Height upto 5m	cum	8809.00
(q)	Height 5m to 10m	cum	9176.00
(r)	Height above 10m	cum	9543.00
(ii)	For T-beam & slab, 25-35% of (a+b+c)		
(p)	Height upto 5m	cum	9176.00
(q)	Height 5m to 10m	cum	9543.00
(r)	Height above 10m	cum	9910.00
D	RCC/PSC Grade M35		
Case 1	Using concrete mixer.		
(i)	For solid slab super-structure, 18-28% of (a+b+c)		
(p)	Height upto 5m	cum	9083.00
(q)	Height 5m to 10m	cum	9468.00
(r)	Height above 10m	cum	9853.00
(ii)	For T-beam & slab, 23-33% of (a+b+c)		
(p)	Height upto 5m	cum	9468.00
(q)	Height 5m to 10m	cum	9853.00
(r)	Height above 10m	cum	10237.00
(iii)	For box girder and balanced cantilever, 38-58% of cost of concrete.		
(p)	Height upto 5m	cum	10622.00
(q)	Height 5m to 10m	cum	11392.00
(r)	Height above 10m	cum	12162.00
Case II	Using Batching Plant, Transit Mixer and Concrete Pump		
(i)	For solid slab super-structure, 18-28% of (a+b+c)		
(p)	Height upto 5m	cum	8853.00
(q)	Height 5m to 10m	cum	9228.00
(r)	Height above 10m	cum	9603.00
(ii)	For T-beam & slab, 23-33% of (a+b+c)		

(p)	Height upto 5m	cum	9228.00
(q)	Height 5m to 10m	cum	9603.00
(r)	Height above 10m	cum	9978.00
(iii)	For box girder and balanced cantilever, 38-58% of cost of concrete.		
(p)	Height upto 5m	cum	10353.00
(q)	Height 5m to 10m	cum	11104.00
(r)	Height above 10m	cum	11854.00
E	PSC Grade M-40		
Case 1	Using concrete mixer.		
(i)	For solid slab super-structure, 20-30% of (a+b+c)		
(p)	Height upto 5m	cum	9539.00
(q)	Height 5m to 10m	cum	9936.00
(r)	Height above 10m	cum	10334.00
(ii)	For T-beam & slab, 25-35% of (a+b+c)		
(p)	Height upto 5m	cum	9936.00
(q)	Height 5m to 10m	cum	10334.00
(r)	Height above 10m	cum	10731.00
Case II	Using Batching Plant, Transit Mixer and Concrete Pump		
(i)	For solid slab super-structure, 18-28% of (a+b+c)		
(p)	Height upto 5m	cum	9107.00
(q)	Height 5m to 10m	cum	9493.00
(r)	Height above 10m	cum	9879.00
(ii)	For T-beam & slab, 23-33% of (a+b+c)		
(p)	Height upto 5m	cum	9493.00
(q)	Height 5m to 10m	cum	9879.00
(r)	Height above 10m	cum	10265.00
(iii)	For box girder and balanced cantilever, 38-58% of cost of concrete.		
(p)	Height upto 5m	cum	10651.00
(q)	Height 5m to 10m	cum	11423.00
(r)	Height above 10m	cum	12195.00
F	PSC Grade M-45		
(i)	For solid slab/voided slab super-structure, 16-26% of cost of concrete (a+b+c)		
(p)	Height upto 5m	cum	9400.00
(q)	Height 5m to 10m	cum	9805.00
(r)	Height above 10m	cum	10210.00
(ii)	For I-beam & slab including launching of precast girders by launching truss upto 40 m span, 21-31% of cost of concrete.		
(p)	Height upto 5m	cum	9805.00
(q)	Height 5m to 10m	cum	10210.00
(r)	Height above 10m	cum	10616.00
(iii)	For cast-in-situ box girder, segmental construction and balanced cantilever, 36-56% of cost of concrete.		

(p)	Height upto 5m	cum	11021.00
(q)	Height 5m to 10m	cum	11831.00
(r)	Height above 10m	cum	12641.00
G	PSC Grade M-50		
(i)	For cast-in-situ box girder, segmental construction and balanced cantilever, 35-55% of cost of concrete		
(p)	Height upto 5m	cum	11311.00
(q)	Height 5m to 10m	cum	12149.00
(r)	Height above 10m	cum	12987.00
H	PSC Grade M- 55		
(i)	For cast-in-situ box girder, segmental construction and balanced cantilever, 35-55% of cost of concrete		
(p)	Height upto 5m	cum	11893.00
(q)	Height 5m to 10m	cum	12774.00
(r)	Height above 10m	cum	13655.00
14.2	a) Supplying, fitting and placing HYSD bar reinforcement in super-structure complete as per drawing and technical specifications	tonne	79602.00
14.3	High tensile steel wires/strands including all accessories for stressing, stressing operations and grouting complete as per drawing and Technical Specifications	tonne	119653.00
14.4	Providing and laying Cement concrete wearing coat M-30 grade including reinforcement complete as per drawing and Technical Specifications	cum	13360.00
14.5	Mastic Asphalt (Providing and laying 12 mm thick mastic asphalt wearing course on top of deck slab excluding prime coat with paving grade bitumen meeting the requirements given in table 500-29, prepared by using mastic cooker and laid to required level and slope after cleaning the surface, including providing antiskid surface with bitumen precoated fine grained hard stone chipping of 9.5 mm nominal size at the rate of 0.005cum per 10 sqm and at an approximate spacing of 10 cm center to center in both directions, pressed into surface when the temperature of surfaces not less than 100 deg. C, protruding 1 mm to 4 mm over mastic surface, all complete as per clause 515.)	sqm	395.00
14.6	Construction of precast RCC railing of M30 Grade, aggregate size not exceeding 12 mm, true to line and grade, tolerance of vertical RCC post not to exceed 1 in 500, centre to centre spacing between vertical post not to exceed 2000 mm, leaving adequate space between vertical post for expansion, complete as per approved drawings and technical specifications.	metre	2196.00
14.7	Construction of RCC railing of M30 Grade in-situ with 20 mm nominal size aggregate, true to line and grade, tolerance of vertical RCC post not to exceed 1 in 500, centre to centre spacing between vertical post not to exceed 2000 mm, leaving adequate space between vertical post for expansion, complete as per approved drawings and technical specifications.	metre	2135.00
14.8	Providing, fitting and fixing mild steel railing complete as per drawing and Technical Specification	metre	3857.00

14.9	Drainage Spouts complete as per drawing and Technical specification	each	1109.00
14.10	PCC M15 Grade leveling course below approach slab complete as per drawing and Technical specification	cum	5955.00
14.11	Reinforced cement concrete approach slab including reinforcement and formwork complete as per drawing and Technical specification	cum	11462.00
14.15	Crash Barriers (The rate analysis for rigid crash barrier in reinforced cement concrete, semi-rigid crash barrier with metal beam and flexible crash barrier with wire ropes have been made and included in chapter-8 on Traffic and Transportation.)		.
14.16	Painting on concrete surface (Providing and applying 2 coats of water based cement paint to unplastered concrete surface after cleaning the surface of dirt, dust, oil, grease, efflorescence and applying paint @ of 1 litre for 2 Sq.m.)	metre	78.00
14.17	Burried Joint (Providing and laying a burried expansion joint, expansion gap being 20 mm, covered with 12 mm thick, 200 mm wide galvanised weldable structural steel plate as per IS: 2062, placed symmetrical to centre line of the joint, resting freely over the top surface of the deck concrete, welding of 8 mm dia. 100 mm long galvanised nails spaced 300 mm c/c along the centre line of the plate, all as specified in clause 2604.)	metre	1443.00
14.18	Filler joint		
(i)	Providing & fixing 2 mm thick corrugated copper plate in expansion joint complete as per drawing & Technical Specification.	metre	4030.00
(ii)	Providing & fixing 20 mm thick compressible fibre board in expansion joint complete as per drawing & Technical Specification.	metre	232.00
(iii)	Providing and fixing in position 20 mm thick premoulded joint filler in expansion joint for fixed ends of simply supported spans not exceeding 10 m to cater for a horizontal movement upto 20 mm, covered with sealant complete as per drawing and technical specifications.	metre	228.00
(iv)	Providing and filling joint sealing compound as per drawings and technical specifications with coarse sand and 6% bitumen by weight	metre	25.00
14.19	Asphaltic Plug joint (Providing and laying of asphaltic plug joint to provide for horizontal movement of 25 mm and vertical movement of 2 mm, depth of joint varying from 75 mm to 100 mm, width varying from 500 mm to 750 mm (in traffic direction), covered with a closure plate of 200mm x 6mm of weldable structural steel conforming to IS: 2062, asphaltic plug to consist of polymer modified bitumen binder, carefully selected single size aggregate of 12.5 mm nominal size and a heat resistant foam caulking/backer rod, all as per approved drawings and specifications.)	metre	3113.00

14.20	Elastomeric Slab Steel Expansion Joint (Providing and laying of an elastomeric slab steel expansion joint, catering to right or skew (less than 20 deg., moderately curved with maximum horizontal movement upto 50 mm, complete as per approved drawings and standard specifications to be installed by the manufacturer/supplier or their authorised representative ensuring compliance to the manufacturer's instructions for installation and clause 2606 of MoRTH specifications for road & bridge works.)	metre	13773.00
14.21	Compression Seal Joint (Providing and laying of compression seal joint consisting of steel armoured nosing at two edges of the joint gap suitably anchored to the deck concrete and a preformed chloroprene elastomer or closed cell foam joint sealer compressed and fixed into the joint gap with special adhesive binder to cater for a horizontal movement upto 40 mm and vertical movement of 3 mm.)	metre	16098.00
14.22	Strip Seal Expansion Joint (Providing and laying of a strip seal expansion joint catering to maximum horizontal movement upto 70 mm, complete as per approved drawings and standard specifications to be installed by the manufacturer/supplier or their authorised representative ensuring compliance to the manufacturer's instructions for installation.)	metre	16813.00
14.23	Modular Strip / Box Seal Joint (Providing and laying of a modular strip Box steel expansion joint including anchorage catering to a horizontal movement beyond 70 mm and upto 140mm, complete as per approved drawings and standard specifications to be installed by the manufacturer/supplier or their authorised representative ensuring compliance to the manufacturer's instructions for installation.)	metre	275927.00
14.24	Modular Strip / Box Seal Joint (Providing and laying of a modular strip box seal expansion joint catering to a horizontal movement beyond 140mm and upto 210mm, complete as per approved drawings and standard specifications to be installed by the manufacturer/supplier or their authorised representative ensuring compliance to the manufacturer's instructions for installation.)	metre	304979.00

Chapter – 15**PROTECTION WORKS****Preamble:**

- 1 Three types of aprons as under have been catered for:
 - a. Boulder apron laid dry
 - b. Boulder apron laid in wire crates
 - c. Apron laid in cement concrete blocks of M 15 grade
- 2 A toe wall for toe protection of pitching can be either in random rubble masonry or in nominal mix cement concrete M 10, or in brick masonry. Depending upon the design, the rates may be adopted under respective clauses.
- 3 Flooring has been proposed in dry rubble stone, rubble stone laid in cement mortar 1:3, cement concrete blocks M 15 and brick on edge laid in cement mortar (CM) 1:3.
- 4 Curtain walls proposed are of the following types:
 - b. Coursed rubble stone masonry (1st sort) is CM 1:3
 - c. Cement concrete M-15 grade
- 5 The rate analysis for gabion structures comprising of stone boulders laid in wire crates have been included. Such structures are suited as retaining structures and for erosion control in river training works especially for situations where some settlement of foundation is anticipated. These structures can adjust in minor settlements, being flexible structures, without losing their functional requirement.

Summary of Rate Analysis

CHAPTER-15

RIVER TRAINING AND PROTECTION WORKS

Item No.	Descriptions	Unit	Rate
15.1	Providing and laying boulders apron on river bed for protection against scour with stone boulders weighing not less than 40 kg each complete as per drawing and Technical specification.		
A	Boulder laid dry without wire crates.	cum	1128.00
15.2	Boulder apron laid in wire crates (Providing and laying of boulder apron laid in wire crates made with 4mm dia GI wire conforming to IS: 280 & IS:4826 in 100mm x 100mm mesh (weaved diagonally) including 10% extra for laps and joints laid with stone boulders weighing not less than 40 kg each.)	cum	1886.00
15.3	Cement concrete blocks (size 0.5 x 0.5 x 0.5 m) (Providing and laying of apron with cement concrete blocks of size 0.5x0.5x0.5 m cast in-situ and made with nominal mix of M-15 grade cement concrete with a minimum cement content of 250 kg/cum as per IRC: 21-2000.)	cum	6316.00
15.4	Providing and laying Pitching on slopes laid over prepared filter media including boulder apron laid dry in front of toe of embankment complete as per drawing and Technical specifications		
A	Stone/Boulder	cum	1128.00
B	Cement Concrete blocks of size 0.3x0.3 x0.3 m cast in cement concrete of Grade M15	cum	6316.00
15.5	Providing and laying Filter material underneath pitching in slopes complete as per drawing and Technical specification	cum	2303.00
15.7	Toe protection (A toe wall for toe protection can either be in dry rubble masonry in case of dry rubble pitching or pitching with stones in wire crates or it can be in PCC M15 nominal mix if cement concrete block have been used for pitching . Rates for toe wall can be adopted from respective clauses depending upon approved design. The rate for excavation for foundation, dry rubble masonry and PCC M15 have been analysed and given in respective chapters.)		
15.8	Providing and laying Flooring complete as per drawing and Technical specifications laid over cement concrete bedding.		
A	Rubble stone laid in cement mortar 1:3	cum	5144.00
B	Cement Concrete blocks Grade M15	cum	8318.00
15.9	Dry rubble Flooring	cum	1486.00
15.10	Curtain wall complete as per drawing and Technical specification		
A	Stone masonry in cement mortar (1:3)	cum	4267.00
B	Cement concrete Grade M15	cum	6192.00
15.11	Flexible Apron :Construction of flexible apron 1 m thick comprising of loose stone boulders weighing not less than 40 kg beyond curtain wall.	cum	1173.00

15.12	Gabian Structure for Retaining Earth (Providing and construction of a gabain structure for retaining earth with segments of wire crates of size 7 m x 3 m x 0.6 m each divided into 1.5 m compartments by cross netting, made from 4 mm galvanised steel wire @ 32 kg per 10 sqm having minimum tensile strength of 300 Mpa conforming to IS:280 and galvanizing coating conforming to IS:4826, woven into mesh with double twist, mesh size not exceeding 100 x 100 mm, filled with boulders with least dimension of 200 mm, all loose ends to be tied with 4 mm galvanised steel wire)	cum	1990.00
15.13	Gabian Structure for Erosion Control, River Training Works and Protection works (Providing and constructing gabain structures for erosion control, river training works and protection works with wire crates of size 2 m x 1 m x 0.3 m each divided into 1m compartments by cross netting, made from 4 mm galvanised steel wire @ 32 kg per 10 sqm having minimum tensile strength of 300 Mpa conforming to IS:280 and galvanizing coating conforming to IS:4826, woven into mesh with double twist, mesh size not exceeding 100 mm x 100 mm, filled with boulders with least dimension of 200 mm, all loose ends to be securely tied with 4 mm galvanised steel wire.)	cum	3346.00

Chapter – 16

REPAIR AND REHABILITATION

Preamble:

- 1 Removal of cement concrete wearing coat and asphaltic wearing coat has been proposed with pneumatic breakers.
- 2 The rate for external prestressing has been analysed for three different spans of 25, 50 and 100 m.
- 3 Sealing of cracks has been proposed with cement grout, cement mortar (1:1) grout and epoxy grout by injecting with grout pump through nipples.
- 4 Bonding of new concrete with old concrete is proposed with epoxy resin.
- 5 The repair and replacement of following structures has been included -
 - a) Bridge Bearings
 - b) Expansion Joints
 - c) Concrete Railing
 - d) Mild Steel Railing
 - e) Crash Barrier

Summary of Rate Analysis

CHAPTER-16

REPAIR AND REHABILITATION

Item No.	Descriptions	Unit	Rate
16.1	Removal of existing cement concrete wearing coat including its disposal complete as per Technical specification without causing any detrimental effect to any part of the bridge structure and removal of dismantled material with all lifts and lead upto 1000m(Thickness 75 mm)	sqm	121.00
16.2	Removal of existing asphaltic wearing coat comprising of 50 mm thick asphaltic concrete laid over 12 mm thick mastic asphalt including disposal with all lift and lead upto 1000m.	sqm	91.00
16.3	Guniting concrete surface with cement mortar applied with compressor after cleaning surface and spraying with epoxy complete as per Technical specification	sqm	923.00
16.4	Providing and inserting nipples with approved fixing compound after drilling holes for grouting as per Technical specifications including subsequent cutting/removal and sealing of the hole as necessary of nipples after completion of grouting with Cement/Epoxy	each	140.00
16.5	Sealing of cracks/porous concrete by injection process through nipples/Grouting complete as per Technical specification.		
A	Cement Grout	kg	41.00
B	Cement mortar (1:1) Grouting	kg	134.00
16.6	Patching of damaged concrete surface with polymer concrete and curing compounds, initiator and promoter, available in present formulations, to be applied as per instructions of manufacturer and as approved by the Engineer.	sqm	1359.00
16.7	Sealing of crack / porous concrete with Epoxy Grout by injection through nipples complete as per clause 2803.1.	kg	767.00
16.9	Removal of defective concrete, cleaning the surface thoroughly, applying the shotcrete mixture mechanically with compressed air under pressure, comprising of cement, sand, coarse aggregates, water and quick setting compound in the proportion as per clause 2807.1., sand and coarse aggregates conforming to IS: 383 and table 1 of IS: 9012 respectively, water cement ratio ranging from 0.35 to 0.50, density of gunite not less than 2000 kg/cum, strength not less than 25 Mpa and workmanship conforming to clause 2807.6.	sqm	347.00
16.10	Applying pre-packed cement based polymer mortar of strength 45 Mpa at 28 days for replacement of spalled concrete	sqm	134.00
16.11	Epoxy bonding of new concrete to old concrete	sqm	190.00
16.17	Replacement of Expansion Joints complete as per drawings	metre	2815.00
16.18	Replacement of damaged concrete railing.	metre	210.00
16.19	Replacement of crash barrier.	metre	369.00
16.20	Replacement of damaged mild steel railing	metre	178.00

16.21	Repair of crash barrier (Repair of concrete crash barrier with cement concrete of M-30 grade by cutting and trimming the damaged portion to a regular shape, cleaning the area to be repaired thoroughly, applying cement concrete after erection of proper form work.)	metre	232.00
16.22	Repair of RCC Railing (Carrying out repair of RCC M30 railing to bring it to the original shape.)	metre	152.00
16.23	Repair of steel Railing (Repair of steel railing to bring it to the original shape)	metre	312.00

Chapter –17

STEEL BRIDGES**Preamble:**

- 1 **Description of items**
The description of items is given briefly and linked with Section 1900 of MoRT&H's Specifications for Road and Bridge Works, which may be referred for detailed description, provisions and interpretation.

- 2 **Overhead Charges**
The rates include over head charges considering the following elements -
 - i. Site accomodation, setting up plant, access road, water supply, electricity and general site arrangements.
 - ii. Office furniture, equipment and communications.
 - iii. Expenditure on
 - a) Corporate office of contractor
 - b) Site Supervision
 - c) Documentation and "as built" drawings
 - iv. Mobilisation/de-mobilisation of resources.
 - v. Labour camps with minimum amenities and transportation to work sites.
 - vi. Light vehicles for site supervision including administrative and managerial requirements
 - vii. Laboratory equipment and quality control including field and laboratory testing
 - viii. Minor T&P and survey instruments and setting out works, including verification of line and dimensions where required.
 - ix. Watch and ward
 - x. Traffic management during construction
 - xi. Expenditure on safeguarding environment
 - xii. Sundries
 - xiii. Financing Expenditure
 - xiv. Sales/Turn over tax
 - xv. Work Insurance/compensation

- 3 20 percent overhead charges has been considered in the schedule of rates

- 4 **Contractor Profit**

10 percent of cost of works. Contractor profit is also added on overhead charges

- 5 **Materials**

- 6 Quantities of materials considered in the rate are approximate for the purpose of estimating and include normal wastages.

- 7 The transportation cost has to be included separately in the estimate as per actual distance from the fabrication shop to work site inclusive of loading and unloading and protected stacking in undamaged condition near site as per direction of the Engineer -in charge .
- 8 Painting and the specifications of materials to be used shall be as per section 1900 of MoRT&H Specifications for Road and Bridge Works.
- 9 One mate has been provided for 25 labours
- 10 Carriage cost of bridge components from protected stacks near site has been included for transportation, assembling and erection as per requirement based on approved erection programme.
- 11 Arrangement for traffic during construction shall be as per Clause 112 of MoRT&H Specifications for Road and Bridge Works.

Summary of Rate Analysis

CHAPTER-17

STEEL BRIDGES

Item No.	Descriptions	Unit	Rate
17.1	Supply and fabrication of steel work at Fabricators workshop comprising of Main Girders, Cross Girders, Connecting plates, stringer, stiffening plates etc. from steel plates and structural steel of specified grades as per approved drawing including straightening, descaling, degreasing, cutting to size and shape, drilling, welding and grinding, supply of all MS/HTS shop or site bolts, nuts & washers, holding down bolts and nuts etc., trial assembling at workshop, one priming coat of shop paint with red lead paint conforming to IS-102 with all labour, material, cost of paints, consumables, stacking in protected condition etc. complete as per specification and as directed by the Engineer-in-Charge (Carriage cost from fabricator work shop to actual bridge site will be paid seperately).		
A	COMPOSITE BRIDGE		
Case (i)	Upto 40m single span or in Multiples	tonne	104935.00
17.2	Taking delivery of fabricated steelwork from stacks at site as necessary, assembling and erection of fabricated steel structure to proper line , level and camber as per approved drawings complete in all respect including transportation and handling supply of all fasteners. Painting of all exposed surfaces of steelwork after erection with one coat of red lead confirming to IS-102 and two coats Alumunimium paint to IS-2339, grouting of anchor bolts in position, including all labour, consumables, materials, machinery, tools and tackles complete as per specification and as directed by the Engineer-in-Charge		
A	COMPOSITE BRIDGE		
Case (i)	Upto 40m single span or in Multiples	tonne	32844.00
